

Medical and Surgical Solutions **Product Portfolio** **2026**

Valemedic®

MISSION

At VALEMEDIC®, our mission is to offer comprehensive, safe, and high-quality medical solutions that contribute to people's well-being and health. We are committed to being a strategic partner for our clients, driving their growth through reliable products, expert care, and exceptional service.

VISION

To be the leading and most trusted brand in the Venezuelan medical products market, recognized for the excellence of our products, the quality of our service, the strength of our parent company R&R MEDICAL EQUIPMENT C.A., and our firm commitment to the development of the health system in Venezuela.

WE ARE **Valemedic**

We are a Venezuelan brand dedicated to the distribution of reliable medical supplies and equipment, with a firm commitment to quality, innovation, and patient well-being.

Backed by our parent company, **R&R MEDICAL EQUIPMENT C.A.**, founded in 2011, we have 14 years of experience providing solutions to the Venezuelan healthcare sector.

At **VALEMEDIC®**, we guarantee products with current health permits, regulatory compliance, traceability processes, and personalized attention, which has allowed us to become a strategic partner for distributors, clinics, hospitals, and professionals throughout the country.

CERTIFICATIONS

SENCAMER CERTIFICATION AND HEALTH PERMIT

Strict compliance with current
legal regulations in Venezuela.

Certification CE y TÜV SÜD

Guarantee of safety, health
and environmental protection
under European standards.

ISO 13485:2016

Specific international standard
for the manufacture of medical
devices.

9001:2015

ISO 9001:2015

Excellence in quality
management processes.

At Valemedic, we understand that quality is the foundation of clinical safety.

Therefore, each of our supplies is backed by the most demanding regulatory bodies at the national and international levels. Under the institutional endorsement of R&R MEDICAL EQUIPMENT, we guarantee that our processes and products meet the safety standards that life demands.

CONTENTS

1. COVER

2. WE ARE VALEMEDIC

3. CERTIFICATIONS

4. CONTENTS

5. ANESTHESIA AND RESPIRATORY

- 6. Corrugated anesthesia circuit | Respiratory pulmonary exerciser
- 7. Oxygen Mask | Nebulizer Mask
- 8. Venturi Oxygen Mask | Endotracheal Tube with Cuff
- 9. Oxygen Mask with Reservoir

10. BIOSECURITY

- 11. Latex Gloves | Nitrile Gloves | Surgical Gloves
- 12. Disposable Face Masks | Disposable Face Masks for Children | Surgical Face Masks
- 13. KN95 face mask

14. CATHETERS

- 15. Epidural Needle | Spinal Needle
- 16. Triple-lumen central venous catheter | Double-lumen hemodialysis catheter
- 17. Intravenous Catheter | Pericranial Equipment (Scalp Vein Set)

18. COMPRESSES, BANDAGES AND COTTON

- 19. Laparotomy Compress | Sterile Gauze 4x4
- 20. Absorbent Cotton Roll | Absorbent Gauze Roll
- 21. Polypropylene Mesh | Adjustable Elastic Bandages with Clip

22. MEDICAL EQUIPMENT

- 23. Anti-decubitus mattress | Digital glucometer
- 24. Premium Nebulizer | Standard Nebulizer | Portable Nebulizer
- 25. Manual Blood Pressure Monitor with Stethoscope | Digital Blood Pressure Monitor
- 26. Pulse Oximeter | Digital Thermometer
- 27. Aurora E12 Multiparameter Monitor

28. SURGICAL INSTRUMENTS

- 29. Electrocautery Pencil | Scalpel Blades

30. MEDICAL LINGERIE

- 31. Surgical Gown | Nurse's Cap | Disposable Shoe Covers

32. ORTHOPEDICS

- 33. Reciprocal Walker | Reciprocal Walker with Wheels
- 34. Tracking Cane for the Blind | 1-Point Cane | 4-Point Cane
- 35. Axillary Crutches | Canadian-Style Crutches
- 36. Commode Chair | Orthopedic Carriage
- 37. Wheelchair

38. INFUSION SET

- 39. Infusion Set with Burette | Blood Transfusion Set
- 40. Macrodrip Infusion Set | Microdrip Infusion Set
- 41. 3-Way Valve with Adapter | Flow Regulator with Extension Set | K-50 Extension Tube

42. PROBES

- 43. Feeding Tubes | Two-Way Foley Catheters
- 44. Nelaton catheters | Suction catheters

45. MEDICAL SUPPLIES

- 46. Hypodermic Needles | ECG Electrodes
- 47. Colostomy Bag | Pediatric Urine Collection Bag | Adult Urine Collection Bag
- 48. Disposable Syringes | Insulin Syringes | 60ml Syringes
- 49. Blood Collection Tubes
- 50. Yellow Obturator (Heparin Cap) | Wound Drainage System | Surgical Sutures

Anesthesia and Respiratory

High-precision solutions for airway management
and ventilatory support.

Solutions that give life

Corrugated Anesthesia Circuit

Code/Reference
CIRCA04

Product benefits

- 01 Patient Safety:** Being a single-use (disposable) device, it eliminates the risk of cross-contamination and transmission of pathogens between patients.
- 02 Airtight Fit:** Connectors manufactured to ISO standards ensure a leak-free connection, maintaining the necessary positive pressure during mechanical ventilation.
- 03 Surgical Versatility:** Its flexibility allows for optimal positioning of the anesthesia machine without compromising gas flow, ideal for head and neck surgeries.
- 04 Dead Space Control:** Optimized design to reduce the volume of gas that does not participate in alveolar exchange, improving ventilation efficiency.

Clinical Uses

- 01 General Anesthesia:** Administration of anesthetic gases during short-, medium-, and long-stay surgical procedures.
- 02 Intraoperative Mechanical Ventilation:** Use in conjunction with the anesthesia machine's ventilator for respiratory control of sedated or relaxed patients.
- 03 Conscious Sedation:** Delivery of gas mixtures during outpatient or diagnostic procedures.
- 04 Critically Ill Patient Transport:** Connection to transport ventilators for safe transfer to recovery areas or intensive care units (ICUs).

Product presentation

Solutions that give life

Respiratory Pulmonary Exerciser

Code/Reference
EJPUL01

Product Benefits

- 01 Prevention of Complications:** Significantly reduces the risk of atelectasis (alveolar collapse) and nosocomial pneumonia following surgical procedures.
- 02 Improved Vital Capacity:** Helps restore mobilized air volume by strengthening the inspiratory muscles (diaphragm and intercostals).
- 03 Bronchial Hygiene:** Facilitates the mobilization and elimination of secretions accumulated in the lower respiratory tract.
- 04 Optimized Gas Exchange:** By promoting deep ventilation, it improves blood oxygenation and carbon dioxide elimination.

Clinical Uses

- 01 Postoperative:** Especially indicated in thoracic, upper abdominal, and cardiac surgery, where pain or anesthesia limits the depth of respiration.
- 02 Chronic Respiratory Diseases:** Adjuvant in the treatment of patients with COPD, asthma, or cystic fibrosis.
- 03 Prolonged Bedridden Conditions:** Prevention of pulmonary stasis in patients with reduced mobility or in intensive care units.
- 04 Pulmonary Rehabilitation:** Part of respiratory physiotherapy protocols to improve inspiratory muscle strength and endurance.

Product presentation

Solutions That Give Life

Oxygen Mask

Code/Reference
MAOXI01

Product Benefits

- 01 Therapeutic Efficacy:** Allows for higher oxygen concentrations (FIO₂) than those achieved with a conventional nasal cannula.
- 02 Visual Monitoring:** The material's transparency allows for observation of lip color, the presence of vomit, or condensation.
- 03 Patient Comfort:** The soft PVC and rounded edges reduce the risk of facial pressure ulcers.
- 04 Universal Compatibility:** Standard funnel-type connector compatible with all hospital flowmeters and oxygen sources.

Clinical Uses

- 01 Acute Hypoxemia:** Treatment of sudden-onset low blood oxygen levels.
- 02 Patient Transfer:** Oxygenation monitoring during transfer between hospital areas.
- 03 Post-Anesthesia Recovery:** Immediate respiratory support following surgical procedures.
- 04 Emergency and Urgent Care:** First-line interface for ambulance services and respiratory triage.

PEDIATRIC

ADULT

Product presentation

Pack
1 Unit

Ctn Box
100 Units

Solutions That Give Life

Nebulizer Mask

Code/Reference
MANEB01

Product Benefits

- 01 Optimized Pulmonary Deposition:** Produces an optimal Mass Airflow Diameter (MAD) (generally < 5 microns), allowing the drug to reach the distal airways.
- 02 Easy Monitoring:** The kit's transparency allows observation of the nebulization rate, remaining medication volume, and the patient's clinical response (skin and mucous membrane color).
- 03 Therapeutic Versatility:** Enables medication administration to patients who cannot coordinate the metered-dose inhaler (MDI) technique, such as infants, the elderly, or critically ill patients.
- 04 Reduced Side Effects:** By acting locally and directly in the lungs, a lower dose is required than with systemic administration, reducing the incidence of adverse effects.

Clinical Uses

- 01 Asthma Exacerbation:** Rapid administration of short-acting bronchodilators.
- 02 Exacerbated COPD:** Management of chronic airway obstruction.
- 03 Laryngitis and Croup:** Administration of racemic epinephrine or corticosteroids to reduce laryngeal edema.
- 04 Cystic Fibrosis:** Administration of hypertonic saline solutions or inhaled antibiotics.
- 05 Acute Bronchitis:** Facilitation of bronchial hygiene through humidification of secretions.

Solutions That Give Life

Venturi Oxygen Mask

Code/Reference
MAVEN01

Product Benefits

- 01 Hypercapnia Control:** This device is the preferred choice for patients with chronic CO₂ retention, as it prevents excessive oxygen administration that could suppress respiratory drive.
- 02 CO₂ Scavenging:** The constant high flow of gas circulating through the mask facilitates the elimination of exhaled carbon dioxide, preventing re-inhalation.
- 03 Therapeutic Stability:** Unlike low-flow systems (such as nasal cannula), the FIO₂ does not change if the patient opens their mouth or breathes rapidly.
- 04 Transparency:** It allows healthcare personnel to immediately monitor skin color, the presence of secretions or vomiting, and the patient's overall condition.

Clinical Uses

- 01 Chronic Obstructive Pulmonary Disease (COPD):** For administering oxygen at low concentrations without the risk of CO₂ narcosis.
- 02 Acute Respiratory Failure:** In the initial stages where stable and controlled oxygenation is required.
- 03 Weaning from Mechanical Ventilation:** As an intermediate step after extubation to ensure a constant FIO₂ during the transition.
- 04 Acute Pulmonary Edema:** When a precise gas mixture is required to improve alveolar oxygenation.

ADULT

Solutions That Give Life

Endotracheal Tube with Cuff

Code/Reference
TUEND04

Product Benefits

- 01 Airway Protection:** The inflated cuff optimally prevents aspiration of gastric contents, blood, or oropharyngeal secretions into the bronchial tree.
- 02 Superior Transparency:** Facilitates observation of water vapor condensation (confirmation of ventilation), as well as the detection of blood or secretions within the tube.
- 03 Biocompatibility:** Latex-free, non-toxic, and pyrogenic material, minimizing inflammatory reactions in the airway.
- 04 Thermal Sensitivity:** PVC softens at 37°C, allowing the tube to conform to the natural curves of the patient's upper airway.

Clinical Uses

- 01 General Anesthesia:** Airway maintenance during surgical procedures requiring muscle relaxation.
- 02 Intensive Care Unit (ICU):** Prolonged mechanical ventilation in patients with acute respiratory failure or coma.
- 03 Emergency Medicine:** Advanced airway management in cardiac arrest, severe trauma, or altered mental status (Glasgow Coma Scale < 8).
- 04 Protection:** Prevention of aspiration pneumonia in patients with intestinal obstruction or a high risk of regurgitation.

Solutions That Give Life

Oxygen Mask with Reservoir

Code/Reference
MARE01

Product Benefits

- 01 Maximum Non-Invasive Oxygenation:** This device is capable of delivering the highest FiO_2 (up to 90%-100%) before resorting to mechanical ventilation or more complex interfaces.
- 02 Safety in Emergencies:** Ideal for the rapid stabilization of patients with severe hypoxemia.
- 03 Gas Efficiency:** Stores oxygen during exhalation so that it is immediately available during the next deep inspiration.
- 04 Hypercapnia Prevention:** The valve system ensures that the inspired gas is rich in O_2 and low in CO_2 .

Clinical Uses

- 01 Acute Respiratory Failure:** In cases of severe hypoxia where other systems (nasal cannulas or simple masks) are insufficient.
- 02 Severe Trauma:** Polytrauma patients requiring immediate optimization of oxygen delivery to tissues.
- 03 Carbon Monoxide (CO) Poisoning:** Essential for accelerating the elimination of carboxyhemoglobin.
- 04 Pre- and Post-extubation Periods:** Preventive support in patients at risk of immediate respiratory collapse.
- 05 Shock or Acute Myocardial Infarction:** To maximize arterial oxygen saturation and reduce cardiac workload.

Product presentation

Biosecurity

Ergonomic and breathable materials that allow for optimal performance during demanding workdays.

Solutions That Give Life

Latex Gloves

Powder-free

Code/Reference
GULAT01

Product Benefits

- 01 Allergy Reduction:** Because it is powder-free, the airborne transmission of allergenic proteins is minimized, protecting both the healthcare professional and the patient.
- 02 Maximum Comfort:** Reduced hand fatigue during prolonged procedures thanks to its low resistance to deformation.
- 03 Effective Biological Protection:** Excellent barrier against bloodborne pathogens and other infectious agents.
- 04 Biocompatibility:** Lower incidence of irritant contact dermatitis compared to powdered models.

Clinical Uses

- 01 Medical and Dental Examinations:** Physical examination, sample collection, and general diagnostic procedures.
- 02 Clinical Laboratories:** Handling biological fluids and non-corrosive cultures.
- 03 Nursing and Critical Care:** Medication administration and management of non-surgical wounds.
- 04 Medical Cleaning Procedures:** Handling contaminated instruments prior to sterilization.

Solutions That Give Life

Nitrile Gloves

Powder-free

Code/Reference
GANIT01

Product Benefits

- 01 Hypoallergenic Safety:** Minimizes the risk of contact dermatitis and eliminates the possibility of latex-induced anaphylaxis.
- 02 Durability:** Its structural robustness allows for extended use in demanding tasks without compromising the barrier's integrity.
- 03 Tactical Sensitivity:** Despite its resistance, it maintains optimal tactile perception for handling fine instruments.
- 04 Process Cleaning:** Being dust-free, it prevents contamination of laboratory samples, electronic components, or surgical surfaces.

Clinical Uses

- 01 Diagnostic Procedures:** General physical examinations and biological sample collection.
- 02 Oncology:** Safe handling of chemotherapeutic agents (cytostatics).
- 03 Dentistry:** High resistance to rotary instruments and impression materials.
- 04 Laboratory and Pharmacy:** Protection against chemical reagents and solvents.
- 05 Critical Care Units:** Management of high-risk patients where maximum biological barrier protection is required.

Surgical Gloves

Pre-powdered

Code/Reference
GAQUI01

Product Benefits

- 01 Exceptional Tactile Sensitivity:** Enables the perception of delicate textures and anatomical structures, essential in microsurgery and dissection.
- 02 Effective Biological Barrier:** High resistance to the permeation of bloodborne pathogens (HIV, Hepatitis B and C) and other microorganisms.
- 03 Operating Room Efficiency:** The pre-powdered system allows for immediate donning, reducing preparation time for surgical and surgical staff.
- 04 Reduced Side Effects:** Its ergonomic design reduces pressure on the palm and thumb, preventing cramps during prolonged surgeries.

Clinical Uses

- 01 Surgical Interventions:** All types of major and minor surgeries in a sterile environment.
- 02 Invasive Procedures:** Central line placement, catheterization, and lumbar punctures.
- 03 Obstetrics and Gynecology:** Childbirth care and cavity examinations.
- 04 Critical Care Units:** Handling open wounds and high asepsis procedures.

Solutions That Give Life

Disposable Face Masks

Code/Reference
MASDES01

Product Benefits

- 01 High Breathability:** Its low pressure differential allows for optimal airflow, reducing heat and CO₂ buildup inside the mask.
- 02 Bacterial Filtration Efficiency (BFE):** Guarantees a filtration capacity of > 95% or 98% (depending on the medical grade classification), protecting against bacteria and viruses carried by Flügge droplets.
- 03 Hypoallergenic Safety:** Made with fiberglass and latex-free materials, reducing the risk of allergic reactions or contact dermatitis.
- 04 Aesthetic and Functional Versatility:** Black is ideal for high-end aesthetic or customer service environments, while blue is the universal standard in surgical and hospital settings.

Clinical Uses and Recommended Uses

- 01 Hospital Environments:** Mandatory use in outpatient clinics, waiting rooms, and triage areas for infection control.
- 02 Surgical Procedures:** Prevents contamination of the sterile field by healthcare personnel.
- 03 Contact Isolation:** Management of patients with respiratory illnesses transmitted by droplets.
- 04 Dental and Aesthetic Services:** Protection against aerosols and splashes generated by frequently used instruments.
- 05 Civilian Use:** Daily protection in public spaces with high population density.

Disposable Face Masks for Children

Code/Reference
MASNI01

Product Benefits

- 01 Superior Biological Protection:** Offers a bacterial filtration efficiency (BFE) greater than 95%, vital in school or clinical settings.
- 02 Comfort and Breathability:** The low pressure differential allows children to breathe without excessive effort, facilitating its use throughout the school day.
- 03 Dermatological Safety:** Fiberglass- and latex-free materials minimize the risk of irritation, eczema, or allergic reactions.
- 04 Adherence to Use:** The blue and pink colors facilitate acceptance of the device by children, promoting hygiene habits.

Clinical Uses and Recommended Uses

- 01 Educational Settings:** Prevention of mass infections in classrooms and enclosed spaces.
- 02 Pediatric and Dental Clinics:** Mandatory use for children in waiting rooms and during medical care.
- 03 School and Public Transportation:** Protection in areas with high population density and limited ventilation.
- 04 Immunocompromised Patients:** Additional protection for children with health conditions that require isolation from environmental pathogens.

KN95 Face Mask

Code/Reference
MAKN01

Product Benefits

- 01 High Filtration Efficiency (PFE/BFE):** Provides superior protection against airborne pathogens compared to surgical masks.
- 02 Optimized Breathability:** Despite its density, the design allows for a low pressure differential, reducing the feeling of suffocation during extended shifts.
- 03 Hypoallergenic:** Made with soft materials that minimize the risk of contact dermatitis or irritation.
- 04 Professional Aesthetics:** The black model offers a discreet and aesthetically pleasing option for administrative or customer service environments, while maintaining the same safety standards as the white model.

Clinical Uses and Professional

- 01 Respiratory Isolation:** For managing patients with suspected or confirmed aerosol-borne diseases (e.g., Tuberculosis, Measles, SARS-CoV-2).
- 02 Aerosol-Generating Procedures (AGPs):** Recommended for use in areas where nebulization, intubation, or suctioning of secretions is performed.
- 03 Surgical and Dental Environments:** As a supplementary barrier against fluids and particles generated by high-speed instruments.
- 04 Industrial and Civil Uses:** Protection against dust, pollen, smoke, and other environmental contaminants.

Catheters

Advanced vascular design to ensure safe, consistent, and minimally invasive access in the most demanding procedures.

Solutions That Give Life

Epidural Needle

Code/Reference
AGUEPI01

Product Benefits

- 01 High Tactical Sensitivity:** The 16G gauge offers optimal rigidity that clearly transmits changes in ligament resistance, increasing the success rate in identifying the epidural space.
- 02 Ease of Catheterization:** The wide internal diameter of the 16G gauge allows for the smooth passage of standard 19G or 20G epidural catheters without resistance or risk of shearing.
- 03 Patient Safety:** The Tuohy bevel design is intended to displace the dural fibers rather than cut them, reducing the incidence of post-dural puncture headache in case of accidental contact.

Clinical Uses

- 01 Regional Anesthesia:** Surgical procedures in the lower abdomen, pelvis, and lower extremities.
- 02 Obstetric Analgesia:** Catheter placement for pain management during labor and cesarean delivery.
- 03 Chronic Pain Management:** Administration of corticosteroids or analgesic drugs into the epidural space for the treatment of radiculopathies or herniated discs.
- 04 Postoperative Analgesia:** Continuous infusion of local anesthetics to improve patient recovery after major surgery.

Spinal Needle

Code/Reference
AGUESPI01

Product Benefits

- 01 Reduction of Post-Dural Puncture Headache (PDPH):** The use of fine gauges (25G-27G) and atraumatic tips drastically reduces CSF loss through the dural puncture site.
- 02 Depth Control:** Excellent tactile feedback allows for clear identification of passage through the ligamentum flavum and dura mater ("dural click").
- 03 Minimal Tissue Trauma:** Small gauges ensure faster recovery of the puncture site and less localized postoperative pain.

Clinical Uses

- 01 Spinal (Subarachnoid) Anesthesia:** For lower abdominal, pelvic, urological, gynecological, and lower extremity surgeries.
- 02 Diagnostic Lumbar Puncture:** Collection of cerebrospinal fluid for biochemical and cytological analysis.
- 03 Intrathecal Drug Administration:** Prevention of pulmonary stasis in patients with reduced mobility or in intensive care units.
- 04 Intracranial Pressure Measurement:** Use in neurological procedures to assess CSF pressure.

Solutions That Give Life

Triple-lumen Central Venous Catheter

Code/Reference
CAVICEN01

Product Benefits

- 01 Multifunctionality:** Allows the infusion of total parenteral nutrition (TPN), inotropic drugs, chemotherapy, and blood products without risk of chemical mixing.
- 02 Hemodynamic Monitoring:** The distal lumen allows continuous measurement of Central Venous Pressure (CVP)
- 03 Durability:** Designed to remain inserted for extended periods under strict aseptic conditions.
- 04 Biocompatibility:** Minimizes platelet adhesion and thrombus formation on the device surface.

Clinical Uses

- 01 Intensive Care:** Administration of high-osmolarity or extreme pH medications (vasopressors, concentrated potassium) that would injure peripheral veins.
- 02 Invasive Monitoring:** Monitoring CVP in hemodynamically unstable patients or those in shock.
- 03 Difficult Venous Access:** Patients with exhaustion of the peripheral venous network or high-volume infusion requirements
- 04 Surgical Management:** Life support during complex surgeries of long duration or with risk of massive hemorrhage

Double-lumen Hemodialysis Catheter

Code/Reference
CAHEBI01

Product Benefits

- 01 Immediate Access:** Ideal for emergency situations where the patient requires dialysis and does not have a mature arteriovenous fistula (AVF).
- 02 Low Recirculation Rate:** The design of the outlet holes is optimized to prevent newly returned blood from being aspirated back into the arterial lumen.
- 03 Insertion Versatility:** 20 cm length suitable for jugular or subclavian access, ensuring that the tip is positioned correctly at the cavo-atrial junction.
- 04 Reduction of Complications:** Its smooth surface decreases platelet adhesion and fibrin sheath formation.

Clinical Uses

- 01 Acute Hemodialysis:** In patients with acute kidney injury (AKI) requiring critical renal support.
- 02 Permanent Access Failure:** Patients with chronic kidney disease (CKD) whose fistula or graft has thrombosis or infection
- 03 Continuous Renal Replacement Therapy (CRRT):** Use in Intensive Care Units for hemofiltration or hemodiafiltration.
- 04 Apheresis and Plasmapheresis:** Plasma exchange procedures that require high extraction flow rates

Solutions That Give Life

Intravenous Catheter

Code/Reference
CAINT01

Product Benefits

- 01 Safety and Leak-Proof:** Universal Luer Lock connection ensures a leak-proof fit with infusion sets, preventing fluid leakage.
- 02 Minimal Vascular Trauma:** The smooth transition between the needle and catheter tip reduces resistance during insertion and the risk of perforation of the posterior vein wall.
- 03 Radiographic Visibility:** The radiopaque material allows for catheter localization by X-ray in case of breakage or accidental migration.
- 04 Versatility:** Wide range of gauges to suit the venous network of neonatal, pediatric, adult, and geriatric patients.

Clinical Uses

- 01 18G Catheter (Green):** Procedures requiring high flow; administration of large volumes of crystalloids, colloids, parenteral nutrition, or massive blood transfusions.
- 02 20G Catheter (Pink):** Standard gauge for most hospital intravenous therapies, administration of irritant drugs, and contrast radiology.
- 03 22G Catheter (Blue):** Ideal for fragile veins, long-term maintenance therapies in chronic patients, or antibiotic administration.
- 04 24G Catheter (Yellow):** Specifically for use in neonatology, advanced pediatrics, and elderly patients with extreme capillary fragility; low-flow, controlled infusions

Solutions That Give Life

Pericranial Equipment Scalp Vein Set

Code/Reference
EQPERI01

Product Benefits

- 01 Accuracy in Difficult Veins:** The low insertion angle and wing stability make it ideal for pediatric, geriatric, or collapsed venous network patients.
- 02 Procedure Safety:** The tube extension acts as a shock absorber, preventing accidental movement of the syringe or infusion set from being transmitted to the needle in the vein.
- 03 Rapid Identification:** Color coding facilitates immediate selection of the appropriate gauge, optimizing clinical response times.
- 04 Biocompatibility:** Latex- and DEHP-free materials reduce the risk of allergic reactions or toxicity.

Clinical Uses

- 01 Blood Sampling:** Ideal for vacuum or syringe systems in patients with fragile or mobile veins.
- 02 Short-Term Infusion:** Administration of boluses of medications, rehydration solutions, or contrast media in radiology.
- 03 Pediatrics and Neonatology:** Venous access in extremities or scalp.
- 04 Geriatrics:** Atraumatic access in patients with thin skin and sclerosed veins.

Compresses, Bandages and Cotton

Insumos de alta pureza diseñados para proteger la piel y acelerar la sanación con absoluta delicadeza.

Solutions That Give Life

Laparotomy Compress

Code/Reference
COMPLAP01

Product Benefits

- 01 Hemostasis Management:** Enables effective packing to control massive bleeding through direct pressure.
- 02 Organ Protection:** Used moist (with saline solution) to protect viscera and delicate tissues from desiccation or mechanical trauma from surgical retractors.
- 03 Maximum Surgical Safety:** Radiological detection and the loop system facilitate compliance with gauze counting protocols, preventing adverse events.
- 04 Biocompatibility:** Hypoallergenic material that does not generate thermal or chemical reactions upon contact with internal tissues.

Clinical Uses

- 01 Abdominal and Pelvic Surgery:** Fluid absorption and retraction of intestinal loops to improve visibility of the surgical field.
- 02 Thoracic Surgery:** Moisture control and protection of lung parenchyma.
- 03 Emergency Trauma:** Temporary packing in damage control surgeries to hemodynamically stabilize the patient.
- 04 Cavity Cleaning:** Removal of cellular debris and irrigation solutions during peritoneal lavage.

Solutions That Give Life

Sterile Gauze 4x4

Code/Reference
GASESTE01

Product Benefits

- 01 Microbiological Safety:** The individual medical-grade packaging (peel-open type) guarantees sterility until opened, preventing nosocomial infections.
- 02 Versatility of Use:** Acts effectively as a primary (direct contact) or secondary (coverage and protection) dressing.
- 03 Biocompatibility:** Being 100% cotton, it is a hypoallergenic material that does not generate chemical reactions upon contact with human tissues.
- 04 Compression Capacity:** Its multi-layered structure allows for the application of light mechanical pressure to aid in capillary hemostasis.

Clinical Uses

- 01 Wound Cleansing:** Removal of debris, exudate, and contaminants from surgical, traumatic, or chronic wounds.
- 02 Primary Dressing:** Coverage of surgical incisions, puncture sites, or skin abrasions.
- 03 Medication Application:** Vehicle for the application of ointments, antiseptic solutions, or healing creams.
- 04 Insertion Site Protection:** Coverage of venous catheter or drain insertion sites.
- 05 Superficial Hemostasis:** Compression of small blood vessels following punctures or minor surgeries.

Solutions That Give Life

Absorbent Cotton Roll

Code/Reference
ROALGO01

Product Benefits

- 01 Fractional Versatility:** Allows the professional to obtain the exact size needed (swabs, sheets, or pads), reducing material waste.
- 02 Antiseptic Efficacy:** Works as the ideal vehicle for applying disinfectant agents (alcohol, povidone-iodine, chlorhexidine), ensuring even distribution over the skin surface.
- 03 Dermal Safety:** Its softness protects the integrity of epithelial tissue during the cleaning of perilesional areas or puncture sites.

Clinical Uses

- 01 Preoperative Antisepsis:** Cleansing of intact skin before injections, venipunctures, or surgical incisions.
- 02 Perilesional Cleansing:** Removal of debris and exudate from wound edges, avoiding direct contact of the fibers with the open wound bed.
- 03 Protection and Cushioning:** Cushioning layer in orthopedic bandages and protection of bony prominences under plaster casts.
- 04 Dental Use:** Moisture control and relative isolation in dental procedures.
- 05 Laboratory:** Application of reagents and cleaning of surfaces or delicate instruments.

Solutions That Give Life

Absorbent Gauze Roll

Code/Reference
ROGASA01

Beneficios Clínicos

- 01 Adaptability:** Allows for the creation of dressings of different sizes to cover surgical wounds, abrasions, or ulcers of varying dimensions.
- 02 Hemostatic Efficacy:** Its structure facilitates uniform mechanical pressure to aid in the hemostasis of superficial wounds.
- 03 Breathability:** Prevents maceration of the wound edges, promoting an environment conducive to the natural healing process.
- 04 Economies of Scale:** Represents an efficient storage option that optimizes operating costs in nursing services and central sterilization units.

Clinical Uses

- 01 Dressing Preparation:** Preparation of sterile surgical gauze after a sterilization process.
- 02 Surgical Cleansing:** Removal of blood residue and secretions during surgery.
- 03 Wound Healing:** Secondary coverage to absorb exudate and protect the wound bed.
- 04 Surgical Bandages:** Securing dressings to large anatomical areas using bandaging techniques.
- 05 Drains:** Use in the manufacture of wicks for draining cavities or open wounds.

Solutions That Give Life

Polypropylene Mesh

Code/Reference
MALLPOLI01

Product Benefits

- 01 Efficient Tissue Integration:** The porous design promotes the formation of robust yet flexible scar tissue, minimizing excessive stiffness at the repair site.
- 02 Surgical Versatility:** The 15x15cm and 30x30cm formats allow the surgeon to make customized cuts according to the hernia defect, optimizing material use.
- 03 Long-Term Stability:** As a non-absorbable material, it ensures definitive repair of the musculoaponeurotic defect, significantly reducing recurrence rates.
- 04 Safety Profile:** Excellent biocompatibility, reducing complications such as surgical site infections or material rejection.

Clinical Uses

- 01 Inguinal Hernioplasty:** Repair of inguinal and femoral hernias using open (Lichtenstein) or laparoscopic techniques.
- 02 Incisional Hernia Repair:** Reinforcement of the abdominal wall after previous surgeries with large defects (eventrations).
- 03 Abdominal Wall Hernias:** Treatment of umbilical, epigastric, and lumbar hernias.
- 04 Pelvic Floor Surgery:** In specific cases of prolapse requiring additional prosthetic support.

Adjustable Elastic Bandages with Clip

Code/Reference
VENELAS01

Beneficios Clínicos

- 01 Dynamic Compression:** Ideal for the effective control of post-traumatic or post-surgical edema, promoting venous and lymphatic return.
- 02 Joint Stability:** Provides functional support for sprains, muscle strains, and minor ligament injuries, allowing for a restricted and safe range of motion.
- 03 Secure Fixation:** The clip system prevents the bandage from shifting during daily activity, reducing the need for frequent readjustments.
- 04 Reuse and Washing:** Highly durable product; it can be washed and dried following the manufacturer's instructions, maintaining its elasticity for multiple uses.

Clinical Uses

- 01 Traumatology:** Support for ankle, knee, and wrist sprains and muscle strains.
- 02 Phlebology:** Compression bandage in the management of chronic venous insufficiency and as prophylaxis in the lower extremities.
- 03 Postoperative:** Securing bulky dressings and compressing surgical areas to prevent hematomas.
- 04 Sports Medicine:** Preventative support bandages for athletes to protect joints from excessive stress.

Medical Equipment

A premium selection of certified equipment, manufactured to offer durability and accuracy in the most demanding medical environments.

Solutions That Give Life

Anti-decubitus Mattress

Code/Reference
COLANTIO1

Product Benefits

- 01 Reduction of Pressure Ulcer Incidence:** The constant redistribution of pressure eliminates the shear and compression forces that cause tissue ischemia.
- 02 Improvement of Blood Perfusion:** By alternating pressure points, blood flow is allowed to be periodically restored to bony prominences (heels, sacrum, trochanters, scapulae).
- 03 Comfort and Quality of Life:** Facilitates restorative rest for the bedridden patient, avoiding discomfort resulting from prolonged immobility.
- 04 Ease of Maintenance:** Its modular design allows for quick cleaning, essential for infection control in hospital or home settings.

Clinical Uses

- 01 Primary Prevention:** Patients at high risk of developing pressure ulcers due to prolonged immobility (paralysis, sedation, extreme weakness).
- 02 Treatment of Pressure Ulcers (Stages I and II):** Aids in the recovery of damaged tissues by reducing pressure on the lesion.
- 03 Palliative Care:** Improved comfort for patients with terminal illnesses or chronic degenerative diseases.
- 04 Post-Surgical Recovery:** Use in patients requiring absolute rest after major surgeries (orthopedic, neurological).

Solutions That Give Life

Digital Glucometer

Code/Reference
GLUDIG01

Product Benefits

- 01 Near-Instant Results:** Obtains readings in as little as 5 seconds, optimizing response time to episodes of hypo- or hyperglycemia.
- 02 Regulatory Accuracy:** Meets international accuracy standards ISO 15197:2013, ensuring superior clinical correlation with centralized laboratory methods.
- 03 Therapy Management:** Before/after meal markers (pre-prandial and post-prandial) help physicians and patients adjust insulin doses or dietary regimens in a personalized way.
- 04 Exceptional Portability:** Includes a hard carrying case that protects the device and its accessories (lancing device and strips), ideal for active patients.

Clinical Uses

- 01 Patient Self-Monitoring (PSM):** For patients with Type 1 and Type 2 Diabetes Mellitus for daily monitoring of their glucose levels.
- 02 Office Screening:** Rapid detection of hyperglycemia in at-risk patients during general consultations.
- 03 Gestational Diabetes Management:** Rigorous monitoring of pregnant patients to prevent fetal or maternal complications.
- 04 Emergency Locations:** Rapid assessment of altered states of consciousness in triage units to rule out glycoemic crises.

Solutions That Give Life

Premium Nebulizer

Benefícios Clínicos

- 01 High Pulmonary Deposition Rate:** The optimized particle size reduces sedimentation in the oropharynx, increasing the amount of drug that reaches the lungs.
- 02 Reduced Therapy Time:** Thanks to its high flow capacity, the drug delivery time is reduced without compromising treatment effectiveness.
- 03 Patient Versatility:** Includes complete kits (PEDIATRIC and adult masks, mouthpiece) to ensure a tight seal and minimize aerosol loss.
- 04 Clinical Durability:** Designed to withstand frequent use cycles in hospital or chronic home care settings.

Clinical Uses

- 01 Chronic Obstructive Pulmonary Disease (COPD):** Administration of short-acting or long-acting bronchodilators.
- 02 Bronchial Asthma:** Treatment of asthma attacks and preventive maintenance with inhaled corticosteroids.
- 03 Respiratory Infections:** Administration of nebulized antibiotics in patients with cystic fibrosis or bronchiectasis.
- 04 Critical Care:** Basic respiratory support in patients with difficulty using metered-dose inhalers (MDIs).

Solutions That Give Life

Standard Nebulizer

Code/Reference
NEBUEST01

Benefícios Clínicos

- 01 Ease of Use:** Intuitive interface with a single on/off button, ideal for patients with limited dexterity or use by caregivers without complex technical training.
- 02 Cost-Effectiveness:** Represents an economical solution for chronic patients who need daily nebulizations without the complexity of hospital/ICU-grade equipment.
- 03 Symptom Reduction:** Rapid relief of bronchial obstruction through the direct deposition of medication particles into the respiratory tract.
- 04 Safety:** Operates using compressed air without the need for chemical propellants (unlike pressurized inhalers), avoiding local irritant reactions.

Clinical Uses

- 01 Asthma Management:** Administration of bronchodilators for the control of wheezing and dyspnea episodes.
- 02 Maintenance Therapy:** Use in patients with chronic bronchitis for the thinning of secretions using saline solution or bronchodilators.
- 03 Post-Respiratory Care:** Facilitation of expectoration in patients with acute catarrhal processes.
- 04 Pediatrics:** Treatment of acute obstructive conditions in pediatric patients using a face mask.

Solutions That Give Life

Portable Nebulizer

Code/Reference
NEBUPOR01

Benefícios Clínicos

- 01 Efficacy in Pulmonary Deposition:** The optimized particle size ($MMAD \leq 5 \mu m$) ensures that the medication effectively reaches the alveoli.
- 02 Multidisciplinary Treatment:** Compatible with a wide range of medications, including bronchodilators, mucolytics, and saline solutions.
- 03 Use at Any Angle:** Allows nebulization even in a tilted or reclined position (up to 45°), facilitating treatment in bedridden or infant patients.
- 04 Patient Independence:** Promotes adherence to treatment by eliminating the barriers of weight, noise, and the need for power outlets associated with conventional equipment.

Clinical Uses

- 01 Asthma Exacerbations:** Immediate rescue administration in any environment (school, work, travel).
- 02 COPD (Chronic Obstructive Pulmonary Disease):** Maintenance therapy outside the hospital setting.
- 03 Cystic Fibrosis / Bronchiectasis:** Administration of solutions for bronchial hygiene.
- 04 Laryngitis and Croup:** Rapid treatment in pediatric patients thanks to its imperceptible operation.

Manual Blood Pressure Monitor with Stethoscope

Code/Reference
TENMAN01

Product Benefits

- 01 Diagnostic Reliability:** By not relying on oscillometric algorithms (like digital devices), it allows for accurate measurements even in patients with arrhythmias, weak pulses, or tremors.
- 02 Professional Control:** The examiner manually determines the deflation rate, reducing the margin of error in patients with severe hypertension or critical hypotension.
- 03 Auscultation Versatility:** The integrated stethoscope is not only for blood pressure measurement but also for basic pulmonary and cardiac assessment.
- 04 Total Autonomy:** A mechanical device that requires no batteries or external power sources, ideal for emergency services, rural areas, or home visits.

Clinical Uses

- 01 Routine Cardiovascular Evaluation:** Blood pressure monitoring in general medicine, cardiology, and nursing consultations.
- 02 Hypertension Screening:** Identification and classification of patients according to international guidelines (JNC 8, AHA/ESC).
- 03 Emergency Monitoring:** Rapid assessment of hemodynamic status in traumatized or shocked patients.
- 04 Teaching Environments:** A fundamental tool for training medical and nursing students in the identification of arterial sounds.

Solutions That Give Life

Digital Blood Pressure Monitor

Code/Reference
TENDIG01

Product Benefits

- 01 Validated Accuracy:** Meets ESH (European Society of Hypertension) accuracy protocols, ensuring consistent readings comparable to invasive methods.
- 02 Prevention of Cardiovascular Risks:** Facilitates the early detection of "silent" hypertension and monitoring of the effectiveness of drug treatments.
- 03 Ease of Use (One-Touch):** Simplified one-button operation, ideal for seniors or patients requiring frequent monitoring without technical assistance.
- 04 Automatic Averaging:** Intelligent function that calculates the average of the last 3 readings to provide a more stable and representative value of actual blood pressure.

Clinical Uses

- 01 Ambulatory Blood Pressure Monitoring (ABPM):** Monitoring the patient outside the clinical setting to rule out the "white coat" effect.
- 02 Management of Chronic Patients:** Daily monitoring of individuals diagnosed with hypertension, heart failure, or kidney disease.
- 03 Geriatric Assessment:** An easy-to-read tool for monitoring cardiovascular health in older adults.
- 04 Preventive Clinical Use:** Rapid screening of vital signs in triage or outpatient clinics.

Solutions That Give Life

Pulse Oximeter

Code/Reference
OXIPUL01

Product Benefits

- 01 Early Detection of Hypoxia:** Allows identification of decreases in oxygenation (silent hypoxia) before clear physical signs such as cyanosis appear.
- 02 Non-Invasive Monitoring:** Instant and painless assessment, avoiding the need for arterial blood gas analysis for routine checks.
- 03 Portability and Autonomy:** Lightweight device ideal for triage services, home visits, sports medicine, and out-of-hospital emergencies.
- 04 Ease of Interpretation:** Provides clear numerical data that helps the professional make quick decisions about the need for oxygen therapy.

Clinical Uses

- 01 Evaluation of Respiratory Patients:** Monitoring in cases of COPD, pneumonia, asthma, and sequelae of viral respiratory conditions.
- 02 Post-Anesthesia Recovery:** Monitoring of oxygen saturation during emergence from minor surgical procedures.
- 03 Sports and Altitude Medicine:** Monitoring adaptation to physical exertion and assessing oxygenation at high altitudes.
- 04 Home Care:** Monitoring chronic patients dependent on oxygen or with congestive heart failure

Solutions That Give Life

Digital Thermometer

Code/Reference
TENDIG01

Product Benefits

- 01 Certified Accuracy:** Offers a minimal margin of error ($\pm 0.1^{\circ}\text{C}$), guaranteeing reliable data for clinical decision-making.
- 02 Patient Safety:** Manufactured with latex-free and non-toxic materials, eliminating the risk of mercury exposure in case of breakage.
- 03 Response Speed:** Provides stable readings in an estimated time of 10 to 60 seconds (depending on the route of administration), optimizing care time.
- 04 Superior Hygiene:** Its smooth, non-porous design facilitates cleaning with 70% alcohol, essential to prevent cross-contamination.

Clinical Uses

- 01 Detection of Fever:** Identification of hyperthermia in infectious, inflammatory, or post-vaccination processes.
- 02 Ovulation Cycle Monitoring:** Tracking basal body temperature for family planning or fertility studies.
- 03 Pediatric and Geriatric Assessment:** Safe temperature control in vulnerable populations thanks to its flexible tip.
- 04 Hospital Triage:** Rapid assessment of vital signs upon patient admission to the emergency department or outpatient clinic.

Solutions That Give Life

Multiparameter Monitor

Aurora E12

Code/Reference
MOMUL01

Product Benefits

- 01 Comprehensive Monitoring:** Enables simultaneous monitoring of multiple organ functions, reducing response time to hemodynamic instability.
- 02 Patient Versatility:** Optimized software with specific profiles for adult, pediatric, and neonatal patients, automatically adjusting alarm and pressure limits.
- 03 Intuitive Interface:** Simple menus and quick access keys facilitate operation even in high-pressure healthcare situations.
- 04 Risk Reduction:** Early detection of severe hypoxia or bradycardia through continuous monitoring significantly improves patient safety outcomes.

Clinical Uses

- 01 Intensive Care Units (ICU):** Close monitoring of critically ill or unstable patients.
- 02 Operating Rooms and Recovery Rooms (PACU):** Monitoring during anesthetic induction, surgery, and postoperative emergence.
- 03 Coronary Care Units:** Continuous monitoring of patients with acute myocardial infarction or congestive heart failure.
- 04 Emergency and Triage:** Rapid assessment of vital signs in patients admitted with trauma or shock.

Touchscreen Compatible

12-inch high-resolution touchscreen and keypad control.

Defibrillation-proof and pacemaker pulse detection.

Protection against defibrillator shocks, resistance to interference from electrosurgical units, and pacemaker pulse detection and inhibition.

Large Storage Capacity

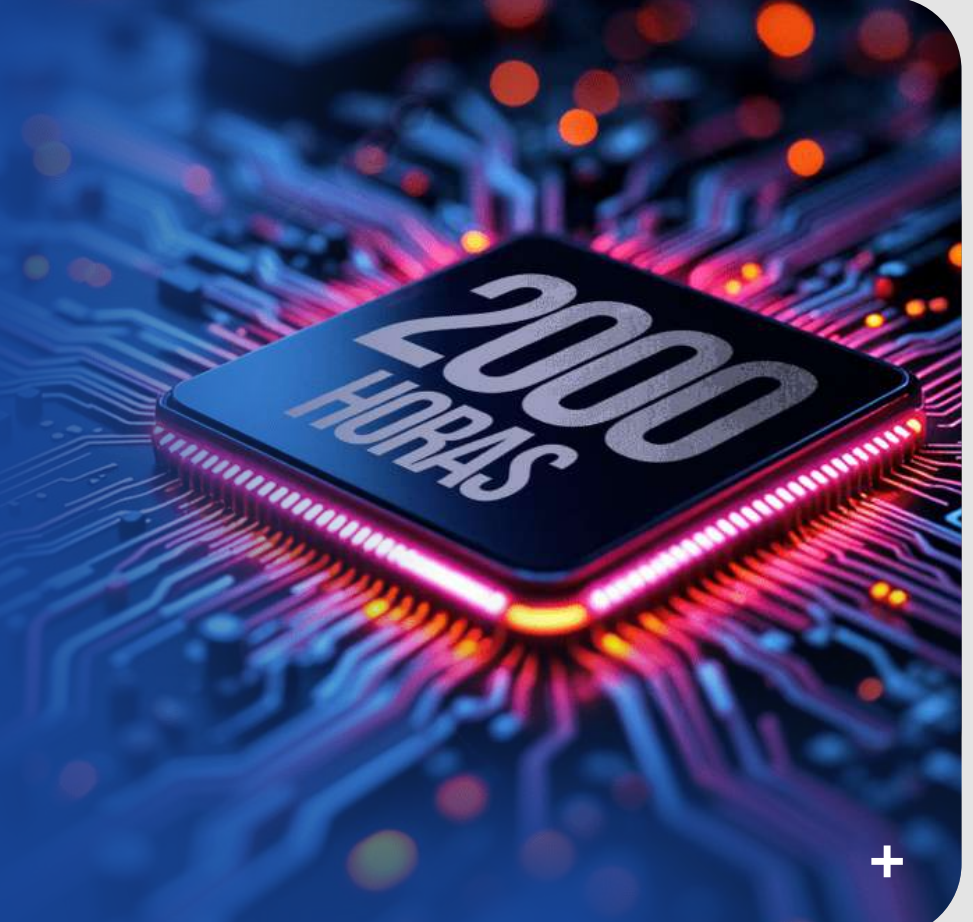

Up to 2,000 hours of trend data:

Up to 12,000 NIBP record groups

2,000 groups of oxygen desaturation events

2,000 event groups of alarm

840 hours of EEG waveform

Multiple monitoring functions

This patient monitor allows for the monitoring of physiological parameters, such as ECG, heart rate (RESP), non-invasive blood pressure (NIBP), oxygen saturation (SpO₂), heart rate (PR), temperature (TEMP), CO₂, and CSM, among others.

Surgical Instruments

High-precision instruments designed to complement the specialist's skill, guaranteeing absolute maneuverability and impeccable cuts in every procedure.

Solutions That Give Life

Electrocautery Pencil

Code/Reference
LAPELEC01

Product Benefits

- 01 Efficient Hemostasis:** Dramatically reduces surgical time by allowing the simultaneous sealing of small and medium-sized blood vessels during cutting.
- 02 Electrical Safety:** High-integrity insulation prevents current leakage, protecting the patient and medical personnel from accidental burns.
- 03 Postoperative Recovery:** Precise control of lateral thermal damage promotes cleaner healing and reduces trauma to adjacent tissues.
- 04 Asepsis Guarantee:** Individually packaged in a peel-open container, guaranteeing a pyrogen-free product ready for use in aseptic surgeries.

Clinical Uses

- 01 General Surgery:** Dissection of anatomical planes and bleeding control in laparotomies and soft tissue surgeries.
- 02 Gynecology and Obstetrics:** Hysterectomy, myomectomy, and cesarean section procedures where rapid hemostasis is required.
- 03 Traumatology and Orthopedics:** Fascial and muscle cutting and cauterization in major joint approaches.
- 04 Plastic Surgery:** Edge refinement and flap dissection with minimal thermal diffusion.
- 05 Urology and Oncology:** Resection of tumor masses and preventive vascular control.

Scalpel Blades

Code/Reference
HOBIS01

Product Benefits

- 01 Atraumatic Incisions:** The microscopic cutting edge reduces the force required for cutting, minimizing pressure necrosis at the wound edges and promoting healing.
- 02 Surgical Safety:** High flexural strength prevents fractures of the tip or blade body under lateral stress.
- 03 Versatility:** The availability of different profiles allows the surgeon to select the exact tool according to the required depth and arc of movement.

Clinical Uses:

- 01 Blade No. 11:** Ideal for emergency procedures such as cricothyroidotomy, abscess aspiration, central catheter insertion, and dissection of small blood vessels.
- 02 Blade No. 15:** Used in surgeries requiring extreme precision, such as excision of skin lesions, hand surgery, podiatry, and periodontal procedures.
- 03 Sheet No. 20:** This is the standard in major surgery for skin and fascia openings in the abdomen, thorax, and extremities, where a long, deep incision is required.

Medical Lingerie

A premium selection of medical textiles that combine lightness and safety, providing the confidence needed to transform every healthcare space into a safe environment.

Solutions That Give Life

Surgical Gown

Code/Reference
BATAQUIR01

Product Benefits

- 01 High Biosecurity:** Significantly reduces the risk of Surgical Site Infections (SSIs) by minimizing skin shedding from personnel onto the patient's wound.
- 02 Comfort and Breathability:** The material allows for the exchange of water vapor (sweat), reducing thermal stress for the surgeon in operating rooms with intense lighting.
- 03 Low Lint Generation:** Minimizes the release of fibers into the environment, a critical factor in preventing foreign body reactions in the patient and obstructions in ventilation systems.
- 04 Tear Resistance:** High tenacity in both dry and wet conditions, preventing accidental ruptures during abrupt surgical maneuvers or the use of heavy instruments.

Clinical Uses

- 01 General Surgery and Specialties:** Medium- and high-complexity surgical procedures (orthopedics, cardiology, neurosurgery).
- 02 Obstetrics Units:** Delivery procedures and cesarean sections with high exposure to fluids.
- 03 Intensive Care Units (ICU):** Performance of invasive procedures at the bedside (central line placement, tracheostomies).
- 04 Oncology and Burn Units:** Management of immunocompromised patients requiring strict barrier protection.

Nurse's Cap

Code/Reference
GORENFE01

Product Benefits

- 01 Infection Control:** Drastically reduces environmental contamination in restricted areas by containing natural skin flakes and hair.
- 02 Occupational Safety:** Protects healthcare personnel from accidental splashes of biological or chemical fluids onto the hair.
- 03 Thermal Comfort:** Its high air permeability facilitates heat exchange, essential in enclosed environments with intense lighting.
- 04 Universal Fit:** Its elongation allows it to be used by personnel with both long and short hair, always ensuring a tight seal at the edges.

Clinical Uses

- 01 Surgical Areas:** Mandatory use for surgeons, scrub nurses, and circulating nurses within the operating room.
- 02 Intensive Care Units (ICUs):** Prevention of nosocomial infections during the management of critically ill patients.
- 03 Laboratories and Pharmacy:** Handling of biological samples or preparation of oncology/parenteral admixtures.
- 04 Dental Services:** Protection against aerosol generated by high-speed rotary instruments.

Solutions That Give Life

Disposable Shoe Covers

Code/Reference
CUBDES01

Product Benefits

- 01 Prevention of Cross-Contamination:** Prevents footwear used in common areas from carrying pathogens to restricted areas such as the Intensive Care Unit (ICU) or the surgical area.
- 02 Personnel Protection:** Protects healthcare professionals from accidental contact with potentially infectious fluids during invasive procedures.
- 03 Compliance with Asepsis Protocols:** Facilitates the transition between areas of different biosafety classifications (black, gray, and white areas).
- 04 Thermal Comfort and Breathability:** Despite its density, the material allows air exchange, preventing excessive heat buildup in the user's footwear.

Clinical Uses

- 01 Operating Rooms and Delivery Rooms:** Mandatory use for all personnel entering the sterile area.
- 02 Intensive Care Units (ICUs):** Control of bacterial load on the floors of units with immunocompromised patients
- 03 Clinical and Pathology Laboratories:** Protection against spills of reagents or biological samples.
- 04 Isolation Areas:** Management of patients with highly transmissible infectious diseases

Orthopedics

Cutting-edge orthopedic technology that combines high-performance materials with superior anatomical design, ensuring stability and comfort at every stage of treatment.

Solutions That Give Life

Reciprocal Walker

Code/Reference
ANDRECIO1

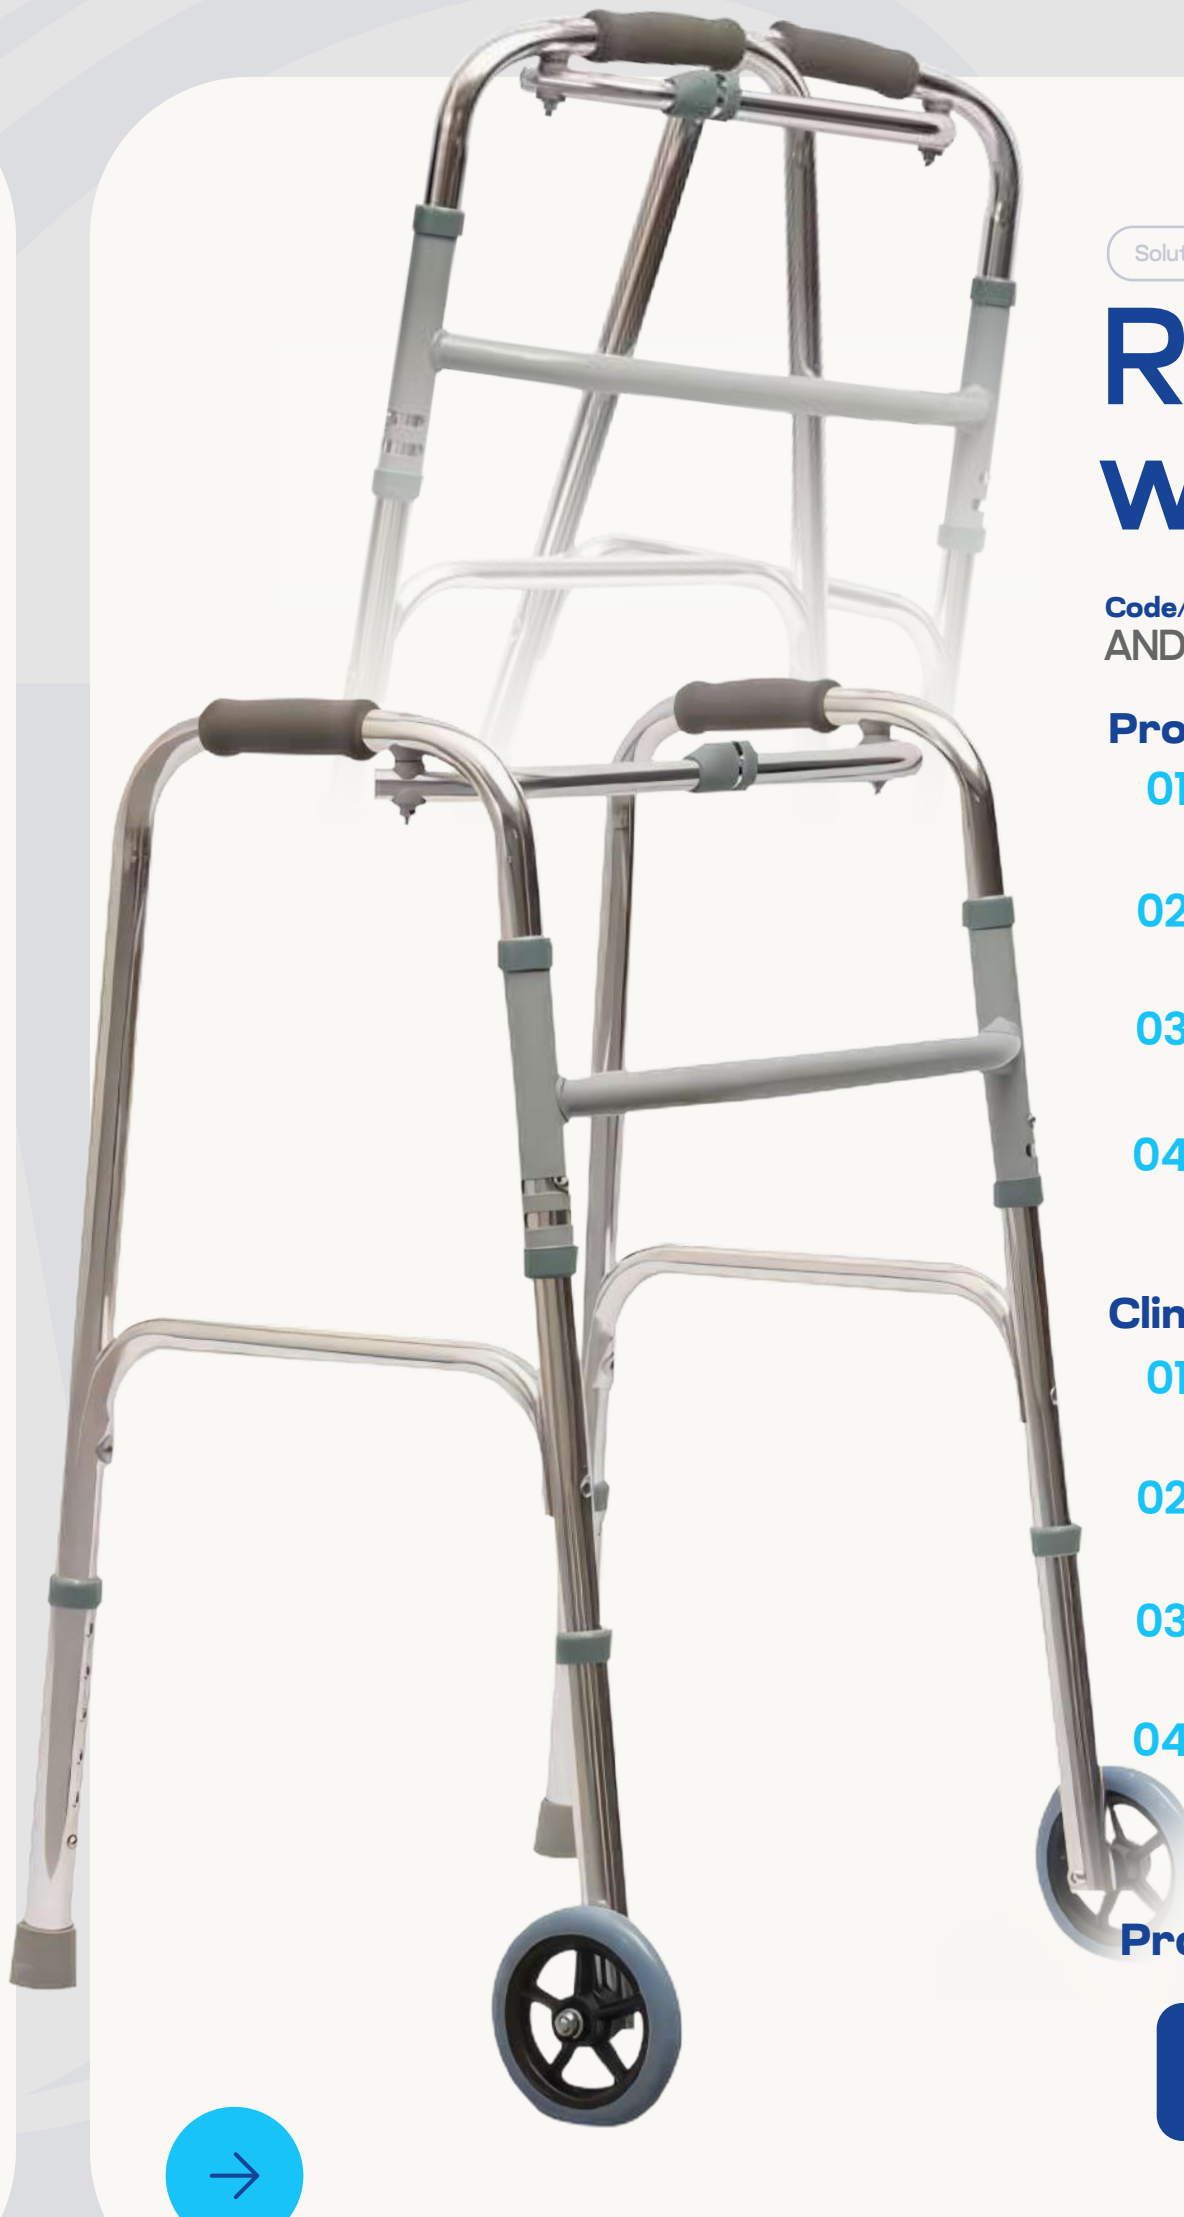

Product Benefits

- 01 Promotion of Natural Gait:** By allowing alternating movement, the device promotes balance and neuromuscular coordination during rehabilitation.
- 02 Reduction of Energy Expenditure:** The user does not need to lift the walker off the ground to move forward (as with stationary models), which decreases muscle fatigue in the upper limbs.
- 03 Superior Stability:** It offers four constant points of contact with the ground, providing a wide and secure base of support for patients at risk of falls.
- 04 Versatility of Use:** It can be configured as a stationary walker (by locking the mechanism) or a reciprocating walker, adapting to the different stages of the patient's recovery.

Clinical Uses

- 01 Checking the Ferrules:** Periodically inspect the rubber feet; if they show excessive wear or cracks, they should be replaced to prevent slippage.
- 02 Height Adjustment:** The handle should be at the height of the greater trochanter (or wrist crease with the arm extended) to ensure the elbow maintains a 20° to 30° flexion.
- 03 Cleaning:** Use a damp cloth with neutral detergent. Avoid using oils or waxes on the handles to prevent compromising grip.
- 04 Safety:** Ensure the folding button and height adjustment bolts are fully locked (audible click) before each use.

Product presentation

Solutions That Give Life

Reciprocal Walker with Wheels

Code/Reference
ANDRERU01

Product Benefits

- 01 Energy Expenditure Optimization:** The front wheels allow uninterrupted movement, reducing the physical effort required by patients with limited strength in their arms and shoulders.
- 02 Gait Retraining:** The reciprocating motion stimulates the neurological patterns of walking, making it fundamental in rehabilitation therapies after stroke or partial spinal cord injuries.
- 03 Safety and Confidence:** The fixed rear support system prevents the walker from unintentionally sliding forward, offering complete control over the speed of movement.
- 04 Ergonomic Adaptability:** The height adjustment allows for maintaining an upright posture, preventing poor posture and lower back pain associated with the use of poorly adjusted devices.

Clinical Uses

- 01 Geriatrics:** Support for older adults with moderate instability who still retain the ability to direct movement but experience rapid fatigue.
- 02 Post-operative Lower Limbs:** Intermediate recovery phase after hip or knee arthroplasty, where support is required but the goal is to expedite gait.
- 03 Neurological Disorders:** Patients with Parkinson's disease or multiple sclerosis who benefit from reciprocal rhythm to prevent freezing of gait.
- 04 Generalized Muscle Weakness:** Chronic patients who require a constant point of support but lack the strength to manipulate a stationary walker.

Product presentation

Solutions That Give Life

Tracking Cane for the Blind

Beneficios Clínicos

- 01 High Biosafety:** Significantly reduces the risk of Surgical Site Infections (SSIs) by minimizing skin shedding from staff onto the patient's wound.
- 02 Comfort and Breathability:** The material allows for the exchange of water vapor (sweat), reducing thermal stress for the surgeon in operating rooms with intense lighting.
- 03 Low Lint Generation:** Minimizes the release of fibers into the environment, a critical factor in preventing foreign body reactions in the patient and obstructions in ventilation systems.
- 04 Tear Resistance:** High tenacity in both dry and wet conditions, preventing accidental ruptures during abrupt surgical maneuvers or the use of heavy instruments.

Clinical Uses

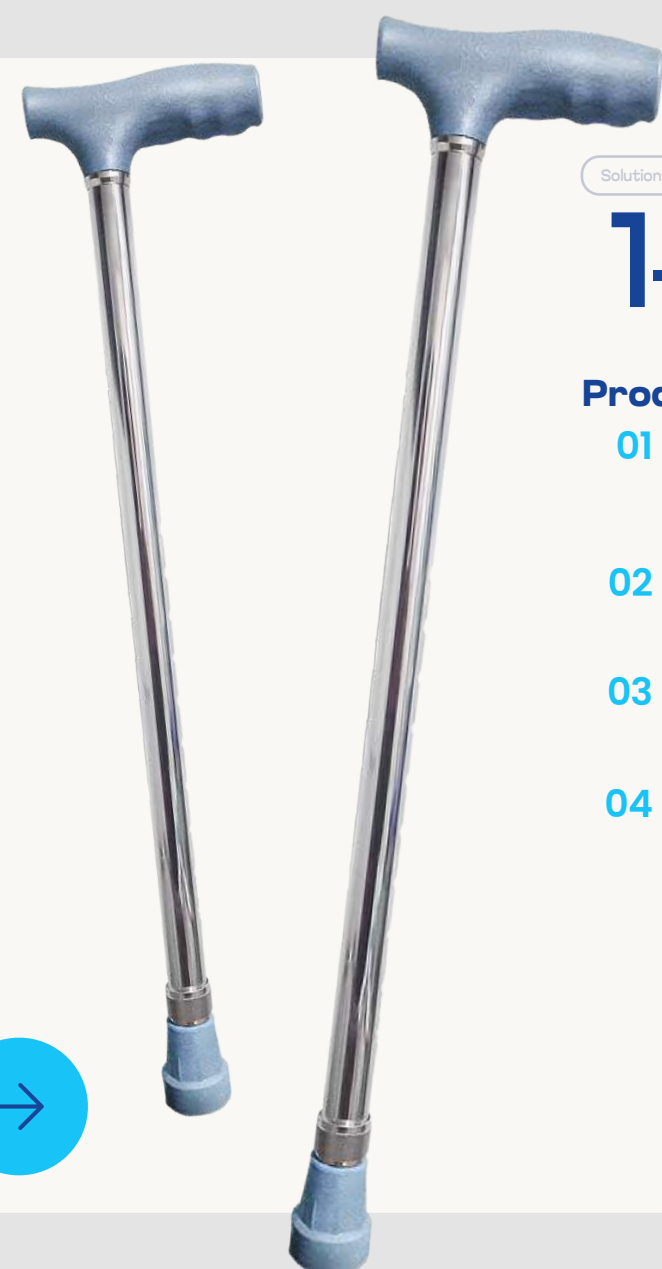

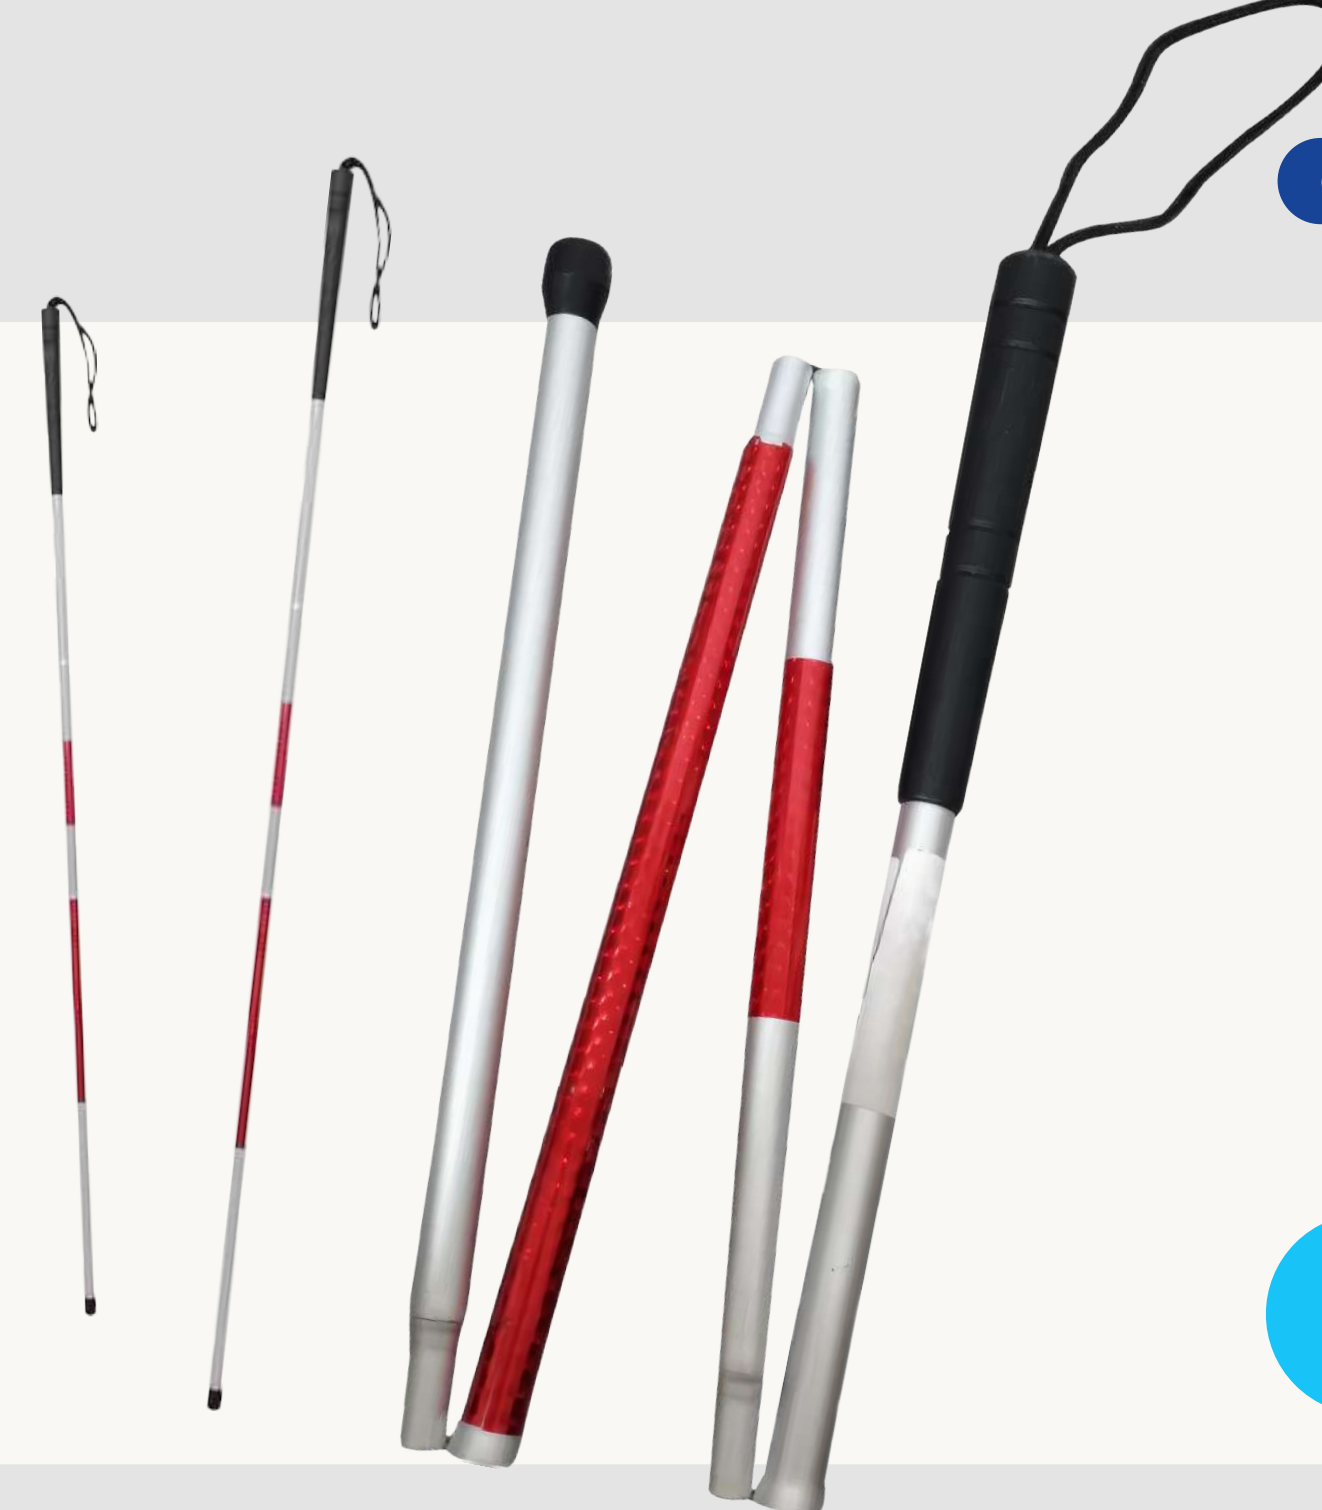

- 01 General Surgery and Specialties:** Medium- and high-complexity surgical procedures (orthopedics, cardiology, neurosurgery).
- 02 Obstetrics Units:** Delivery procedures and cesarean sections with high exposure to fluids.
- 03 Intensive Care Units (ICU):** Performance of invasive procedures at the bedside (central line placement, tracheostomies).

Solutions That Give Life

1-Point Cane

Code/Reference
BASTUN01

Product Benefits

- 01 Improved Dynamic Balance:** Increases the patient's base of support, providing an additional point of support that compensates for sensory or motor deficits.
- 02 Joint Unloading:** Reduces mechanical stress on weight-bearing joints (hip, knee, or ankle) during the stance phase of gait.
- 03 Fall Prevention:** Offers confidence and stability to patients with mild vertigo, postural instability, or compensated muscle weakness.
- 04 Portability and Ergonomics:** Its lightweight design facilitates transport and reduces fatigue in the user's wrist and shoulder.

Clinical Uses

- 01 Arthritis and Osteoarthritis:** Pain relief in patients with degenerative processes in the lower limbs.
- 02 Advanced Post-Operative Care:** Support in the transition to independent walking after knee or hip surgery.
- 03 Mild Neurological Deficits:** Assistance in patients with mild hemiparesis or peripheral neuropathies that affect balance.
- 04 Geriatrics:** Preventive support for older adults who present a slight decrease in their postural stability.

Solutions That Give Life

4-Point Cane

Code/Reference
BASTCUA01

Product Benefits

- 01 Maximum Postural Stability:** By providing four points of support, it significantly reduces oscillations of the center of gravity, providing technical and psychological safety to the patient.
- 02 Independent Support:** By standing on its own, it prevents the patient from having to bend down to pick it up, reducing the risk of falls due to loss of balance.
- 03 Efficient Load Distribution:** It allows for more significant weight distribution than a single-point cane, making it an ideal intermediate step between a walker and a conventional cane.
- 04 Safety on Uneven Surfaces:** The four points of contact compensate for small irregularities in the terrain that could destabilize a single point of support.

Clinical Uses

- 01 Stroke Sequelae (Hemiparesis):** It is the gold standard for patients with unilateral weakness who require firm support on the unaffected side.
- 02 Neurological Diseases:** Useful in patients with Ataxia, Parkinson's, or Multiple Sclerosis who present with moderate instability.
- 03 Lower Limb Post-Operative Care:** Advanced phase of rehabilitation after joint replacements where fear of independent walking persists.
- 04 Geriatrics:** Older adults with sarcopenia or balance disorders who need a wide base of support for intra-home mobility.

Solutions That Give Life

Axillary Crutches

Code/Reference
MULEAXI01

Product Benefits

- 01 Effective Weight Offloading:** Allows for complete weight-bearing on a limb or controlled partial weight-bearing, accelerating bone consolidation and tissue healing.
- 02 Anthropometric Versatility:** Available in standard sizes (Adult, Youth, and Pediatric), covering a wide range of heights with a single device.
- 03 Improved Functional Independence:** Facilitates movement on uneven terrain and stairs, providing a more dynamic base of support than a walker for patients with good balance.
- 04 Prevention of Complications:** The padding design reduces the risk of skin irritation and vascular compression under the arm.

Clinical Uses

- 01 Traumatology:** Fractures of the femur, tibia, fibula, or foot bones requiring complete immobilization of the limb.
- 02 Postoperative:** Recovery after arthroscopies, joint replacements, or corrective lower limb surgeries.
- 03 Ligament and Tendon Injuries:** Grade II and III sprains, or Achilles tendon ruptures.
- 04 Rehabilitation:** Initial phases of gait retraining where a wide and secure base of support is needed.

Canadian-Style Crutches

Code/Reference
MULECAN01

Product Benefits

- 01 Greater Freedom of Movement:** Its compact design facilitates movement through confined spaces, stairs, and public transportation compared to axillary crutches.
- 02 Neurological Preservation:** By not having axillary support, the risk of radial nerve palsy or vascular injury from improper support is completely eliminated.
- 03 Promotion of Physiological Posture:** It forces the user to maintain a straighter position, promoting spinal alignment and improving the dynamic gait pattern.
- 04 Prolonged Use:** It is the device of choice for patients with permanent or long-term disabilities due to its lightness and ergonomics.

Clinical Uses

- 01 Long-Term Rehabilitation:** Patients with sequelae of poliomyelitis, mild cerebral palsy, or muscular dystrophies.
- 02 Post-operative Lower Limb Care:** Advanced recovery phase where more agile unilateral or bilateral support is required.
- 03 Chronic Injuries:** Lower limb amputations (use of prostheses) or severe joint instability in the knee or ankle.
- 04 Neurological Diseases:** Multiple sclerosis or incomplete spinal cord injuries that allow assisted ambulation.

Commode Chair

Code/Reference
SILLSANI01

Model
BME665

Product Benefits

- 01 Fall Prevention:** Reduces the risk of accidents on the way to the bathroom, especially at night or in patients with postural instability.
- 02 Optimization of Physical Effort:** By acting as a toilet seat riser, it minimizes excessive hip and knee flexion, a critical factor in patients with prostheses or severe osteoarthritis.
- 03 Hygiene and Comfort:** Facilitates nursing and home care tasks, allowing for safe and controlled bowel movements near the patient's resting area.
- 04 Durability and Resistance:** The materials used are resistant to moisture and hospital disinfection chemicals.

Clinical Uses

- 01 Post-Hip or Knee Surgery:** Patients with restricted deep flexion of weight-bearing joints.
- 02 Geriatrics:** Older adults with sarcopenia, generalized weakness, or urge incontinence.
- 03 Palliative Care:** Patients with severely limited mobility requiring bedside assistance.
- 04 Neurological Rehabilitation:** People with sequelae of stroke or spinal cord injuries who need stable support for personal hygiene.

Product presentation

Solutions That Give Life

Orthopedic Carriage

Code/Reference
COCHORT01

Model
BME4620

Product Benefits

- 01 Pressure Ulcer and Bedsore Prevention:** The tilting capability allows for frequent postural changes, relieving pressure on the ischial tuberosities.
- 02 Improved Organ Function:** Assisted upright positioning promotes digestion, bowel transit, and optimizes vital lung capacity.
- 03 Spasticity Control:** Positioning components (such as the abductor wedge) help inhibit pathological reflexes and maintain joints within functional ranges.
- 04 Social Integration:** By providing a stable and comfortable base, the stroller facilitates the child's active participation in school and recreational activities.

Clinical Uses

- 01 Cerebral Palsy (CP):** Management of patients with varying levels of motor impairment (GMFCS II-IV).
- 02 Muscular Dystrophy and Spinal Muscular Atrophy:** Support for patients with progressive muscle weakness requiring full trunk support.
- 03 Myelomeningocele (Spina Bifida):** Safe mobility for patients with sensory and motor impairment in the lower limbs.
- 04 Genetic Syndromes and Psychomotor Delay:** Positioning assistance for children with severe hypotonia.

Solutions That Give Life

Wheelchair

Model
SYIV100-D-CX-GB

Code/Reference
MOMUL01

Product Benefits

- 01 Promoting Autonomy:** The propulsion ring design allows patients with preserved upper limb strength to move independently.
- 02 Preventing Postural Injuries:** The firm back support helps maintain spinal alignment, reducing the risk of fatigue kyphosis.
- 03 Facilitating Care:** The foldable, detachable, and removable components reduce the physical effort required by healthcare personnel or caregivers during transfers.
- 04 Terrain Versatility:** The 8" swivel front wheels allow for a small turning radius, ideal for maneuvering in narrow hallways and indoor spaces.

Clinical Uses

- 01 Postoperative Rehabilitation:** Transporting patients after lower limb or spinal surgery.
- 02 Geriatrics:** Assisting older adults with reduced mobility, muscle fatigue, or a high risk of falls.
- 03 Traumatology:** Temporary mobility in patients with fractures, severe sprains, or ligament injuries that prevent weight-bearing.
- 04 Hospital Transfers:** Internal transfer of patients between medical services, diagnostic areas, and waiting rooms.

Product presentation

 **Ctn Box**
1 Unit

Wheels

Front Maneuvering Wheels

Solid **8-inch** wheels made of hard, durable plastic with a high-impact rim, which rotate 360°, making it easy to turn in tight spaces.

Rear Drive Wheels

24-inch wheels with spoked rims and ergonomic propulsion rims that allow the user to move independently.

Armrests

Padded for greater comfort, straight and fixed for better stability.

Dual Braking System

The wheelchair's dual braking system allows for greater patient independence without compromising stability. It features a brake on the upper handles and a manual lever brake for added safety.

Metal Footrests

Its footrests are foldable and height-adjustable to adapt to the user's body shape and facilitate access.

Designed to keep up
with you, wherever
you go.

Infusion Set

Infusion systems designed to ensure a consistent drip rate and precise fluid administration, optimizing the effectiveness of each medical treatment.

Solutions That Give Life

Infusion Set with Burette

Code/Reference
SETBUR01

Product Benefits

- 01 Patient Safety:** The controlled drip system prevents the accidental administration of large volumes of fluid, a critical factor in neonatology and pediatrics.
- 02 Pharmacological Accuracy:** Facilitates the preparation of drug dilutions that require a specific concentration and a slow infusion rate.
- 03 Prevention of Air Embolism:** Thanks to its automatic shut-off valve, it provides an additional layer of technical safety during chamber emptying.
- 04 Versatility:** Compatible with various types of crystalloid solutions, colloids, and light parenteral nutrition.

Clinical Uses

- 01 Pediatrics and Neonatology:** It is the standard for fluid administration in low body weight patients where fluid balance is measured in millimeters.
- 02 Intensive Care Units (ICUs):** Infusion of vasoactive, inotropic, or sedative drugs that require precise dosing by microdrip.
- 03 Antibiotic Administration:** Preparation of intermittent doses of antibiotics to be infused at specific times (e.g., 30 or 60 minutes).
- 04 Geriatric Patients:** Management of patients with heart or kidney failure who have restricted daily fluid volume.

Blood Transfusion Set

Code/Reference
TRANSAN01

Product Benefits

- 01 Hemodynamic Safety:** The 200-micron filter is the clinical standard for preventing pulmonary embolic complications resulting from cell microaggregation.
- 02 Blood Component Protection:** Smooth internal surfaces and biocompatible materials minimize mechanical damage to red blood cells (hemolysis) during transit.
- 03 Versatility of Use:** Compatible with gravity infusion systems and infusion pumps designed for PVC tubing (after pressure validation).
- 04 Pyrogenicity:** Guaranteed pyrogen- and latex-free product, reducing the risk of non-hemolytic febrile reactions.

Clinical Uses

- 01 Red Blood Cell Transfusion:** Restoration of oxygen-carrying capacity in patients with severe anemia or active bleeding.
- 02 Fresh Frozen Plasma Administration:** Correction of coagulation factor deficiencies.
- 03 Platelet Transfusion:** Management of severe thrombocytopenia or platelet dysfunction.
- 04 Post-surgical Recovery:** Replacement of blood volume and components in major surgeries with significant blood loss.

Solutions That Give Life

Macrodrop Infusion Set

Code/Reference
SETMACRO01

Product Benefits

- 01 Biosafety:** Latex-free and DEHP-free product, reducing the risk of allergic reactions and toxicity in sensitive patients.
- 02 Superior Transparency:** The clarity of the PVC tubing facilitates line inspection to ensure the absence of air before connection to the patient.
- 03 Kink Resistance:** Tubing designed to maintain flow patency even if the patient moves or the tubing is slightly bent.
- 04 Sterility Guarantee:** Individually packaged in a medical-grade blister pack that ensures the device's pyrogenicity and sterility until the time of use.

Clinical Uses

- 01 Parenteral Hydration:** Fluid and electrolyte replacement in patients with dehydration or prolonged fasting.
- 02 Medication Administration:** Infusion of antibiotics, analgesics, and other drugs diluted in large-volume solutions.
- 03 Maintenance of a Patent Line:** Use in patients requiring constant venous access for emergencies.
- 04 Support Therapy:** Used in emergency rooms, general hospital wards, and operating rooms for basic hemodynamic management.

Solutions That Give Life

Microdrip Infusion Set

Code/Reference
SETMICRO01

Product Benefits

- 01 Dosing Accuracy:** Allows for the administration of small volumes of potent drugs (vasoactive, sedatives) with minimal error.
- 02 Neonatal and Pediatric Safety:** It is the device of choice for pediatric patients, where even a minimal excess volume can compromise cardiac or renal function.
- 03 Phlebitis Prevention:** By allowing low, controlled flows, it reduces mechanical and chemical irritation of the venous intima caused by rapid infusions of irritating medications.
- 04 Biosafety:** Latex-free and DEHP-free, preventing allergic reactions and ensuring compatibility with a wide range of oncology and critical medications.

Clinical Uses

- 01 Pediatrics and Neonatology:** Hydration and parenteral nutrition in infants and children with limited fluid requirements.
- 02 Intensive Care Units (ICU):** Infusion of inotropic drugs, antiarrhythmics, and other medications with a "narrow therapeutic margin."
- 03 Geriatrics:** Management of elderly patients with congestive heart failure or renal failure requiring fluid restriction.
- 04 Oncology:** Administration of chemotherapy drugs that must be infused at very slow and constant rates.

Solutions That Give Life

3-Way Valve with Adapter

Beneficios Clínicos

- 01 Therapeutic Versatility:** Facilitates multi-infusion therapy, allowing for the intermittent administration of incompatible medications through a single catheter.
- 02 Reduced Risk of Infection:** By minimizing the need to disconnect and reconnect lines, the system's exposure to environmental pathogens is reduced.
- 03 Secure Connection:** The rotating Luer Lock adapter ensures a tight seal, eliminating leaks of biological fluids or critical solutions.
- 04 Intuitive Operation:** The visually coded control (available in blue for venous) facilitates rapid line identification by nursing staff.

Clinical Uses

- 01 Intensive Care Units (ICUs):** Simultaneous administration of vasoactive drugs, sedatives, and basal solutions.
- 02 Anesthesiology and Operating Room:** Injection of anesthetic induction boluses during maintenance infusion.
- 03 Oncology:** Controlled administration of cytostatic agents requiring immediate flushing or cleansing of the line.
- 04 Emergencies:** Collection of venous blood samples and rapid administration of volume expanders.

Flow Regulator with Extension Set

Code/Reference
REGFLU01

Product Benefits

- 01 Superior Accuracy to Macro drip Sets:** Eliminates the variability of gravity drips, providing a more stable and safer infusion rate for the patient.
- 02 Optimized Nursing Time:** Reduces the need for constant monitoring and recalculation of drops per minute, simplifying therapy scheduling.
- 03 Alternative to Infusion Pumps:** Ideal for out-of-hospital transfers, emergency departments, or inpatient areas where electronic pumps are not available for each patient.
- 04 Patient Safety:** Minimizes the risks of chemical phlebitis or fluid overload by preventing accidental high-velocity flows.

Clinical Uses

- 01 Outpatient Chemotherapy:** Controlled infusion of cytostatic agents requiring specific administration times.
- 02 Hydration Therapy in Geriatrics:** Fluid management in patients with heart failure where the hourly volume must be precise.
- 03 Antibiotic Administration:** Infusion of drugs requiring constant dilution and infusion time to maintain optimal plasma levels.
- 04 Patient Transfer:** Maintenance of patent airways and supportive flows during ambulance transport or between hospital departments.

Solutions That Give Life

K-50 Extension Tube

Code/Reference
TUBEXT01

Product Benefits

- 01 Vascular Access Security:** Acts as a motion buffer, preventing direct pulls from the main infusion set from injuring the vein or displacing the catheter.
- 02 Patient Comfort:** Provides an additional range of motion, allowing for position changes in bed or short transfers without compromising the integrity of the line.
- 03 Therapeutic Versatility:** Facilitates the connection of multiple devices (such as stopcocks or filters) at a safe distance from the puncture site, maintaining a more organized work area for nursing staff.
- 04 Reduction of Drug Waste:** With a short priming path, it ensures that most of the medication reaches the bloodstream quickly.

Clinical Uses

- 01 Pediatrics and Neonatology:** Extension of infusion lines where very small volumes are handled, and maximum catheter lightness is required.
- 02 Intensive Care Unit (ICU):** Connection of syringe pumps for the administration of sedation or inotropes.
- 03 Anesthesiology and Operating Room:** Extension of the venous access so that the anesthesiologist can administer drugs away from the surgical field.
- 04 Interventional Radiology:** Connection of contrast media or fluids during diagnostic imaging procedures.

Probes

A specialized line of probes that combines structural flexibility with superior technical rigor, guaranteeing an optimal clinical response in every phase of treatment.

Solutions That Give Life

Feeding Tubes

Code/Reference
SONALIMI01

Product Benefits

- 01 Critical Patient Safety:** Full radiopacity prevents bronchopulmonary administration errors by allowing standard radiological confirmation.
- 02 Pediatric and Adult Versatility:** The availability of ultra-thin gauges (Fr 5) allows for nutritional support in neonates and infants
- 03 Blockage Prevention:** The side-hole design facilitates the passage of nutritional formulas and crushed medications without collapsing the tube.
- 04 Hypoallergenic:** Latex-free product, eliminating the risk of hypersensitivity reactions during prolonged use.

Clinical Uses

- 01 Neonatal Nutritional Support (Fr 5):** Feeding of premature or newborn infants with weak sucking or neurological immaturity.
- 02 Short-Term Enteral Nutrition:** Administration of polymeric diets in patients with altered mental status, stroke, or head and neck neoplasms.
- 03 Drug Administration:** Access route for pharmacotherapy in patients unable to take medication orally.
- 04 Gastric Lavage and Aspiration (Fr 12):** Removal of gastric contents in cases of poisoning or mild gastric decompression.

Solutions That Give Life

Two-Way Foley Catheters

Code/Reference
SONFOLE01

Product Benefits

- 01 Improved Biocompatibility:** The silicone coating reduces the risk of chemical urethritis and superficial allergic reactions associated with standard latex.
- 02 Secure Staying:** The high-strength balloon prevents accidental expulsion, allowing for safe patient management for periods of up to 30 days (at the physician's discretion).
- 03 Versatility of Sizes:** The range from Fr 14 to Fr 20 allows for adaptation to male and female urethral anatomy, as well as the management of different urinary sediment densities.
- 04 Guaranteed Sterility:** Individual peel-open packaging ensures pyrogenicity and protects the device until the time of the procedure.

Clinical Uses

- 01 Acute or Chronic Urinary Retention:** Relief of bladder distension in patients with infravesical obstruction (e.g., benign prostatic hyperplasia).
- 02 Diuresis Monitoring:** Strict control of urinary output in critically ill patients or those undergoing major surgery.
- 03 Urological Postoperative Care:** Maintenance of urethral patency and drainage of clots after bladder or prostate surgery.
- 04 Severe Urinary Incontinence:** Palliative management in patients with skin lesions (bedsores) aggravated by moisture.

Solutions That Give Life

Nelaton Catheters

Code/Reference
SONDNELO1

Product Benefits

- 01 Safety in Rapid Procedures:** By not having a balloon, it eliminates the risk of injury from accidental inflation of the urethra.
- 02 Hygiene and Infection Control:** As a single-use (disposable) device, it significantly reduces the risk of catheter-associated urinary tract infections (CAUTIs).
- 03 Versatility of Application:** Its design allows its use not only in urology, but also in emergency departments for aspiration of oropharyngeal or gastric secretions in specific sizes.
- 04 Minimal Trauma:** The smoothness of the side holes prevents the "suction effect" on the bladder wall during final drainage.

Clinical Uses

- 01 Intermittent Bladder Emptying:** Management of patients with neurogenic bladder or urinary retention who require drainage several times a day.
- 02 Sterile Sample Collection:** Obtaining urine directly from the bladder for urine cultures, avoiding contamination from external urethral flora.
- 03 Post-Void Residual Volume Measurement:** Accurate assessment of the amount of urine remaining in the bladder after spontaneous urination.
- 04 Secretion Aspiration:** In emergency situations, it can be used to clear the upper airways of mucus, blood, or vomit.
- 05 Medication Instillation:** Administration of drugs directly into the bladder cavity (intravesical therapies).

Product Benefits

- 1. Optimization of Gas Exchange:** Effective removal of secretions prevents the formation of mucus plugs and atelectasis, improving patient oxygenation.
- 2. Prevention of Nosocomial Pneumonia:** Reduces the bacterial load in the airways by evacuating accumulated fluids that serve as a culture medium.
- 3. Safe Insertion:** The tip design and side eyes protect the integrity of the cilia and tracheal mucosa during vigorous suctioning maneuvers.
- 4. Universal Compatibility:** The color-coded connector ensures a tight seal with any standard vacuum unit or collection bottle.

Clinical Uses

- 1. Endotracheal Aspiration:** Clearing the bronchial tree in patients connected to mechanical ventilation via orotracheal tubes or tracheostomy cannulas.
- 02 Nasopharyngeal and Oropharyngeal Aspiration:** Removal of saliva, vomit, or blood in patients with a diminished cough reflex or unconscious state.
- 03 Bronchial Hygiene in Cystic Fibrosis:** Assistance in the mobilization of thick secretions in chronic patients.
- 04 Postoperative Care:** Prevention of respiratory complications after major thoracic or abdominal surgeries.

Medical Supplies

Essential, high-turnover supplies designed to ensure the operational continuity of your healthcare facility, guaranteeing that every procedure is supported by certified, high-quality materials.

Solutions That Give Life

Hypodermic Needles

Code/Reference
AGUHIPO01

Product Benefits

- 01 Pain Reduction:** The combination of precision beveling and silicone lubrication ensures virtually painless insertion, increasing patient comfort.
- 02 Safety and Asepsis:** Pyrogen-, latex-, and DEHP-free product, minimizing the risk of allergic or inflammatory reactions.
- 03 Versatility of Gauges:** A wide range of sizes allows for everything from delicate intradermal administrations to high-flow venous blood draws.
- 04 Structural Reliability:** A firm connection between the cannula and connector withstands manual injection pressures without risk of detachment.

Clinical Uses

- 01 Drug Administration:** Intradermal, subcutaneous, intramuscular, and intravenous injections.
- 02 Vaccination:** Mass immunization in patients of all ages thanks to the variety of lengths.
- 03 Blood Collection:** Venous or arterial blood collection for laboratory analysis.
- 04 Aesthetic Procedures:** Application of botulinum toxin or fillers in ultra-fine gauges (30G-31G).
- 05 Fluid Aspiration:** Collection of fluids from cysts or minor joint effusions.

ECG Electrodes

Code/Reference
ELECECG01

Product Benefits

- 01 High-Clarity Tracing:** The sensor's low impedance allows for clear P waves, QRS complexes, and T waves, facilitating accurate cardiac diagnosis.
- 02 Stability in Stress Tests:** Its excellent adhesion prevents detachment caused by patient movement or excessive perspiration.
- 03 Patient Safety:** Latex-free and free of irritating components, significantly reducing the risk of contact dermatitis.
- 04 Operational Efficiency:** The easy-peel design allows for quick placement and removal by nursing staff or ECG technicians.

Clinical Uses

- 01 Resting Electrocardiography:** Performance of standard 12-lead diagnostic ECGs.
- 02 Continuous Monitoring:** Monitoring of heart rhythm in Intensive Care Units (ICUs), operating rooms, and recovery rooms
- 03 Stress Tests (Ergometry):** Signal capture during controlled physical activity.
- 04 Holter Systems:** Recording of cardiac electrical activity for periods of 24 to 72 hours.
- 05 Emergency Services:** Rapid evaluation of patients with chest pain or suspected arrhythmias.

Colostomy Bag

Benefícios Clínicos

- 01 Skin Integrity:** The medical-grade hydrocolloid prevents peristomal dermatitis by maintaining a balanced pH and a physical barrier against digestive enzymes.
- 02 Discretion and Comfort:** The bag's low profile and quiet material allow the device to go unnoticed under clothing, promoting the patient's social reintegration.
- 03 Leak-Proof Security:** The reinforced perimeter seal minimizes the risk of accidental leaks, providing peace of mind during physical activity or rest.
- 04 Easy Management:** Designed so that the patient can change and empty the bag independently, promoting self-care.

Clinical Uses

- 01 Colostomy:** Collection of formed or semi-formed stool following a colonic diversion (permanent or temporary).
- 02 Ileostomy:** Management of liquid and enzymatic effluent from the ileum (requires more frequent emptying).
- 03 Immediate Postoperative Care:** Monitoring stoma viability and bowel function after colorectal surgery.
- 04 Fistula Management:** Collection of drainage from low-flow enterocutaneous fistulas

Pediatric Urine Collection Bag

Code/Reference
BOLRECP01

Product Benefits

- 01 Non-Invasive Collection:** Eliminates the need for bladder catheterization for obtaining simple samples, reducing stress for pediatric patients and the risk of iatrogenic infections.
- 02 Skin Safety:** The high-tech adhesive protects the baby's skin barrier, making it suitable even for sensitive skin or premature infants.
- 03 Contamination Prevention:** The adhesive's perimeter seal acts as a barrier against fecal matter and external secretions, preserving the purity of the urine sample.
- 04 Ease of Use:** Intuitive design allows nursing staff or parents to apply it quickly and effectively.

Clinical Uses

- 01 Urinary Tract Infection (UTI) Screening:** Collection of samples for partial urinalysis and colony count in febrile infants without an obvious focus.
- 02 Metabolic Monitoring:** Collection of urine for screening tests for inborn errors of metabolism or glucosuria.
- 03 Renal Function Assessment:** Measurement of point urine output in pediatric patients under observation.
- 04 Laboratory Studies:** Collection for urine densitometry and urine electrolyte levels.

Solutions That Give Life

Adult Urine Collection Bag

Code/Reference
BOLRECOA01

Product Benefits

- 01 Infection Prevention (HAI):** The closed circuit and anti-reflux valve act as a physical barrier against bacterial colonization of the urinary tract.
- 02 Hemodynamic Monitoring:** Facilitates strict control of fluid balance, essential in critically ill, renal, or post-surgical patients.
- 03 Durability and Safety:** High-frequency sealed seams prevent leakage of biological fluids, protecting both the patient and healthcare personnel.
- 04 Operational Ease:** The ergonomic design of the drain valve reduces handling time and improves hospital hygiene protocols.

Clinical Uses

- 01 Indwelling Bladder Drainage:** Patients with long-term Foley catheters for urinary retention or obstructive incontinence.
- 02 Postoperative Care:** Urine collection after urological, gynecological, or major abdominal surgeries.
- 03 Intensive Care Units (ICU):** Hourly measurement of urine output to assess renal function and shock status.
- 04 Patients with Limited Mobility:** Facilitation of urinary elimination in bedridden or wheelchair-bound patients

Disposable Syringes

Beneficios Clínicos

- 01 Accurate Dosing:** The clarity of the graduations and the piston adjustment ensure that the administered volume corresponds strictly to the medical prescription.
- 02 Biosafety:** Latex-free and DEHP-free product, eliminating the risk of allergic reactions or leaching toxicity.
- 03 Versatility of Use:** The variety of capacities allows for applications ranging from vaccine administration to the reconstitution of lyophilized drugs in large volumes.
- 04 Certified Sterility:** Each unit is delivered in individual blister packaging (medical-grade paper/plastic film) that guarantees pyrogenicity and sterility.

Clinical Uses

- 01 Parenteral Administration:** Intramuscular, subcutaneous, intravenous, and intradermal injections of drugs.
- 02 Drug Reconstitution:** Aspiration of diluents and mixing of powdered medications for subsequent administration.
- 03 Biological Sample Collection:** Aspiration of venous or arterial blood and other body fluids for clinical analysis.
- 04 Venous Access Management:** Flushing and patency of peripheral or central catheters with saline solution.
- 05 Specialized Procedures:** Fine-needle aspiration (FNAB) and exudate collection.

Clinical Uses

- 01 Treatment of Type 1 and Type 2 Diabetes Mellitus:** Daily subcutaneous administration of basal and bolus insulin regimens.
- 02 Tuberculin Skin Testing (PPD):** The 1 ml model is widely used for intradermal testing due to its precise graduation.
- 03 Aesthetic Medicine (Mesotherapy):** Application of botulinum toxin and other active ingredients in micro-doses.
- 04 Neonatology:** Administration of critical medications requiring extremely low volumes (less than 0.5 ml).

Solutions That Give Life

60ml Syringes

Code/Reference
JERDES6001

Product Benefits

- 01 Fluid Handling Safety:** The material being latex- and DEHP-free ensures biocompatibility, eliminating the risk of allergic reactions or chemical leaching into the patient.
- 02 Application Versatility:** Capable of performing functions in both parenteral administration and nutritional support, as well as cavity irrigation.
- 03 Control Ergonomics:** The design of the gripping fins (finger support) is wide and robust, allowing for firm control during the aspiration of viscous or dense substances.
- 04 Surgical-Grade Sterility:** Individual blister packaging (medical-grade paper and plastic film) maintains the product's pyrogenicity until the moment of use.

Type of syringes
Luer Lock and Tommy Type
Needle-free

Clinical Uses

- 01 Enteral Feeding:** Administration of nutritional formulas and medications through nasogastric or gastrostomy tubes.
- 02 Washing and Aspiration:** Irrigation of surgical wounds, body cavities, or washing of bladder and gastric catheters.
- 03 Critical Medication Administration:** Use in syringe infusion pumps for the controlled delivery of vasoactive or sedative drugs (specifically the Luer Lock model).
- 04 Sampling:** Aspiration of large volumes of biological fluids (ascitic, pleural, or synovial) for laboratory analysis.

Blood Collection Tube

Beneficios Clínicos

- 01 Analytical Accuracy:** Precise dosage of the additive prevents inadequate dilution or partial coagulation of the sample, ensuring reliable results.
- 02 Biological Safety:** The closed vacuum system significantly reduces the risk of exposure to bloodborne pathogens (HIV, Hepatitis B and C) for the phlebotomist.
- 03 Workflow Efficiency:** Standardized color coding (ISO 6710) allows for rapid sorting and reduces human error in the pre-analytical phase.
- 04 Universal Compatibility:** Standard dimensions (13 x 75 mm or 13 x 100 mm) are compatible with most clinical laboratory racks and centrifuges.

Blue Cap (3.2% Sodium Citrate)

Product Specifications

- 01 Additive:** Buffered Sodium Citrate (0.109 mol/L).
- 02 Mechanism:** Reversible calcium chelator that keeps blood in a liquid state for functional testing.
- 03 Mixing Ratio:** 1 part anticoagulant to 9 parts blood.
- 04 Clinical Uses:** Coagulation tests (PT, PTT, Fibrinogen, Thrombin Time, D-Dimer).
- 05 Recommended Inversions:** 3 to 4 times gently.

Purple Cap (EDTA K₂)

Product Specifications

- 01 Additive:** Ethylenediaminetetraacetic Acid (Dipotassium or Tripotassium EDTA).
- 02 Mechanism:** Irreversible calcium chelator that preserves cell morphology and prevents platelet aggregation.
- 03 Clinical Uses:** Complete blood count (CBC), reticulocyte count, blood smear, glycated hemoglobin (HbA1c), and blood typing.
- 04 Recommended Inversions:** 8 to 10 times.

Red Cap (Additive-Free)

Product Specifications

- 01 Mechanism:** Accelerates clot formation for rapid fibrin-free serum.
- 02 Clotting Time:** 30 to 60 minutes at room temperature.
- 03 Clinical Uses:** Clinical chemistry, serology, immunology, tumor markers, and blood bank testing.
- 04 Recommended Inversions:** 5 to 8 times.

Solutions That Give Life

Yellow Obturator (Heparin Cap)

Code/Reference
OBTUAMA01

Product Benefits

- 01 Maintaining Patency:** Facilitates the "heparin lock" or saline flushing technique, preventing thrombus formation at the catheter tip.
- 02 Reducing Healthcare-Associated Infections (HAIs):** By keeping the system closed, it acts as a barrier against the entry of microorganisms into the bloodstream.
- 03 Patient Comfort:** Allows for greater patient mobility by not requiring a permanently connected infusion line.
- 04 Therapeutic Versatility:** Ideal for outpatient or inpatient treatments where medication is administered in boluses or at specific intervals.

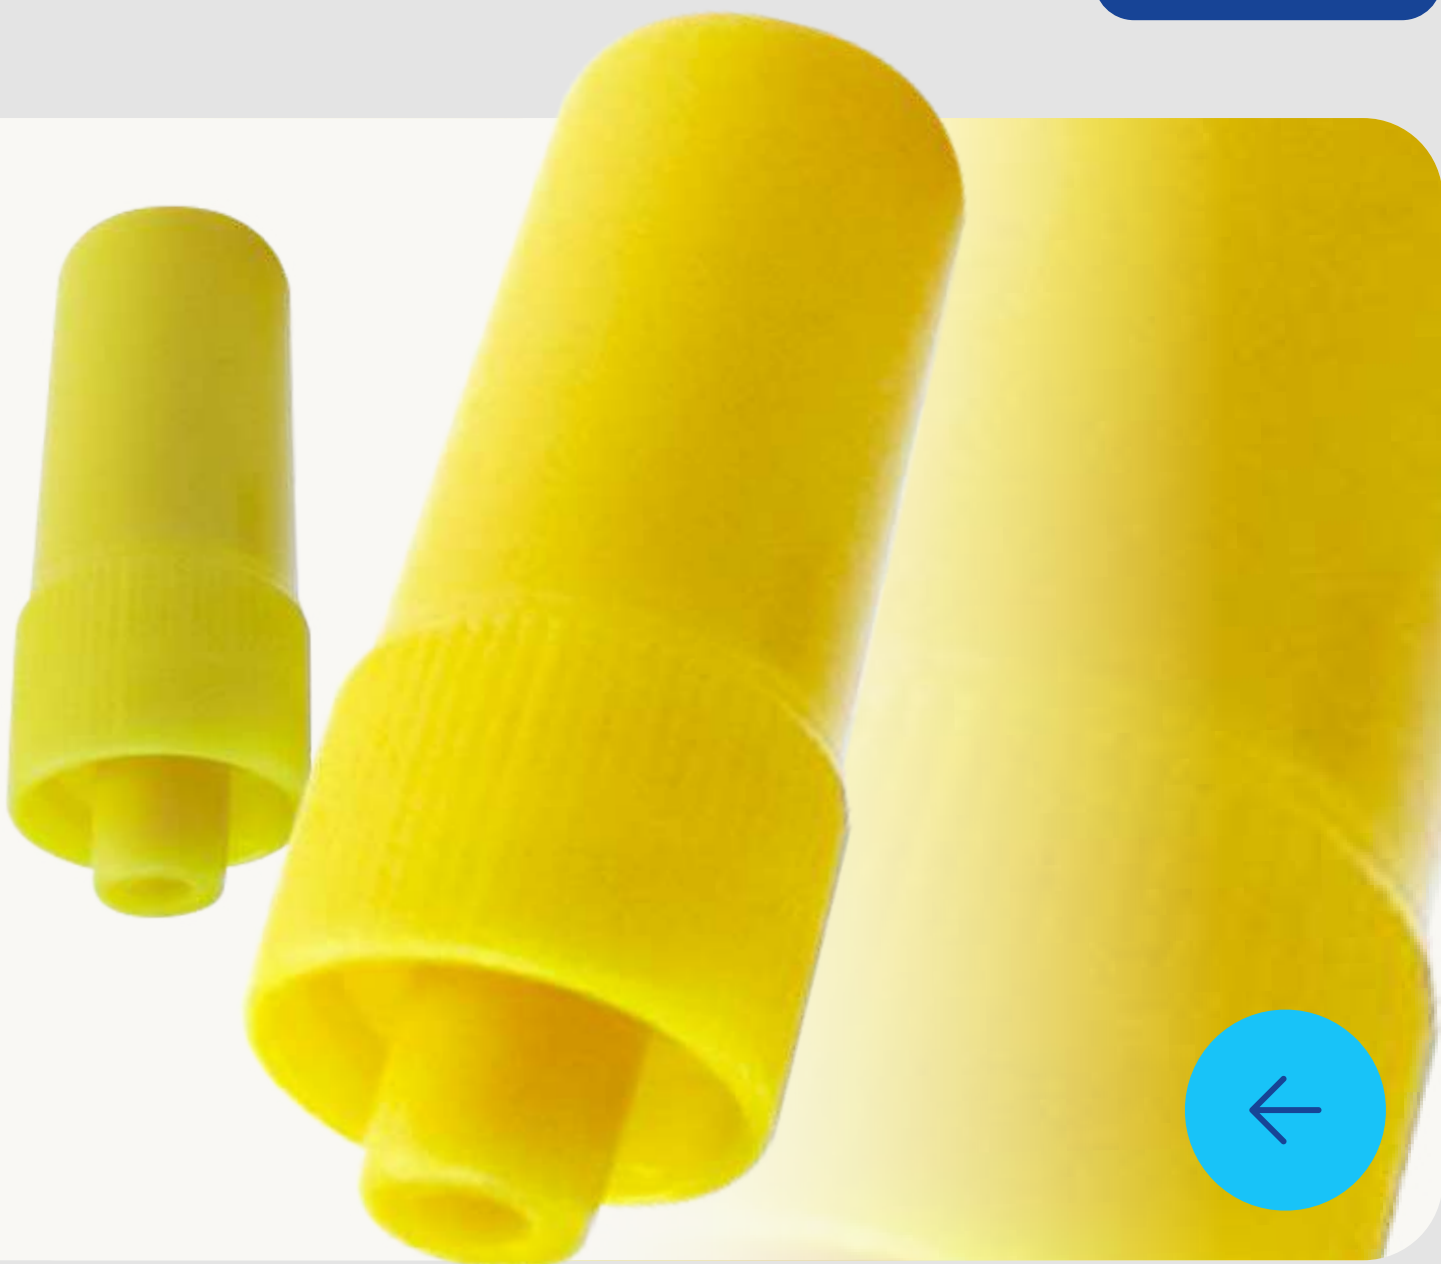

Clinical Uses

- 01 Peripheral Venous Access:** Sealing catheters (Jelcos) for intermittent administration of antibiotics, analgesics, or hydration.
- 02 Central Catheters:** Protecting the lumens of central venous catheters (CVCs) that are not in continuous use.
- 03 Sample Collection:** Quick access point for blood collection in emergency laboratories.
- 04 Emergency Use:** Allows for maintaining a patent IV line ready for immediate use in unstable patients.

Solutions That Give Life

Wound Drainage System

Code/Reference
SISDREHE01

Product Benefits

- 01 Complication Reduction:** Prevents the accumulation of fluids that can compress adjacent structures or serve as a culture medium for pathogens.
- 02 Healing Promotion:** Negative suction helps eliminate "dead space" between tissues, promoting faster and firmer tissue union.
- 03 Local Hemodynamic Monitoring:** Allows the surgical team to detect postoperative bleeding early by observing the volume and characteristics of the drained fluid.
- 04 Biosafety:** The closed-loop design protects both the patient and healthcare personnel from exposure to potentially infectious biological fluids.

Calibers	Fr10 - 1/8	Fr18 - 1/4
Capacity	400ml	

Clinical Uses

- 01 Orthopedic Surgery:** Especially in total hip and knee replacements where bone bleeding is persistent.
- 02 Plastic and Reconstructive Surgery:** In procedures such as abdominoplasty, mammoplasty, and flaps, to prevent seromas
- 03 General and Oncologic Surgery:** Mastectomies, axillary dissections, and extensive abdominal procedures.
- 04 Spinal Surgery:** Prevention of epidural hematomas that could compromise neurological function

Solutions That Give Life

Surgical Sutures

Code/Reference
SUTUQUI01

Product Benefits

- 01 High-Performance Needles:** Precision-sharpened tip that maintains its penetration capacity after multiple passes.
- 02 Knot Security:** Coefficient of friction optimized to allow knot descent and fixation without risk of slippage.
- 03 Medical-Grade Packaging:** Double envelope that guarantees sterility and facilitates transfer to the surgical field without excessive thread memory.

Clinical Uses

Polyglactin 910 - Absorbable

Uses: Soft tissue approximation, ligatures, gastrointestinal surgery, urology, and gynecology.

Chromic Catgut - Absorbable

Uses: Deep planes requiring rapid absorption, mucosal closure, general surgery, and gynecology.

Nylon - Non-Absorbable

Uses: Skin closure (plastic and general surgery), microsurgery, ophthalmology, and cardiovascular surgery.

Silk - Non-Absorbable

Uses: Vessel ligation, oral surgery, neurosurgery, and device fixation (drains).
